There are three things that are essential to a well established mercantile business: Quality merchandise, service which satisfies the public, and prices which please the customer.

It is easy for us to buy quality merchandise; service can be developed with courtesy, accuracy, and speed, but to lower prices there must be better buying and more sales. In order to buy more economically and thereby lower our prices, we have decided to sell for cash. All sums under \$10.00 will be cash; and for all sums over \$10.00 we will take an approved note bearing interest. We will start selling for cash on September 1st.

We thank our customers for their patronage in the past and hope our merchandise, service, and prices will justify a continuance of the same in the future.

Health Grams

Three per cent of the automobile drivers are careless while 97 per cent exercise every reasonable precaution to avoid accidents. This was the conclusion of a large railroad based upon the reports of a group of its inspectors who observed in one day the approach of 26,000 automobiles to grade crossings.

While one would not be justified in drawing such a conclusion on the basis of available evidence it is probable that the 3 per cent of careless drivers are responsible for most of the great loss of life and health due to automobile accidents. One road hog or one drunken driver increases the hazard of all motorists who happen to be upon the road at that time and the more crowded the highway the greater the number involved in danger.

If 97 per cent of the population exercised every reasonable precaution to avoid accidents to their health a large number of diseases that now afflict mankind would be summarily stricken from the list of evils which beset humanity. Diphtheria, for example, would certainly disappear if 97 per cent of the susceptible children were immunized with toxin-antitoxin.

Let a man of 35 or 40 who earns \$2,500 a year die. The economic loss to those who depend upon him is equivalent to \$30,000 according to insurance statisticians of recognized standing. In other words it would take \$30,000 well invested, to give his family a steady income equivalent to that provided by a man of 40 who earns \$2,500 per year.

A considerable percentage of deaths among people between 30 and 50 are really accidental -altho caused by disease. Tuberculosis, heart disease, digestive disturbances and pneumonia figure prominently in the causes of mortality at these age limits and they are regarded more and more as accidental for people under fifty. A child for example, is accidentally the offspring of tuberculous parents and they not only expose him to infection but are prevented, often enough, thru physical disability from providing adequately for the child's healthful living.

Taking out diseased tonsils may be to a child's health at 40 what a stop at a railway crossing is to the safety of automobile passengers. Both actions anticipate the possibilities of future danger and both give the cautious the advantage of any doubt.

The same is true of a thousand precautions concerning health. Right diet is a common lack among many children that leads to health troubles later on. Too little sleep too much indoors and too little exercise are other common neglects that do health no good.

So it happened that an evening later Jean arrived home after a weary day to find a daintily set table, a beautifully cooked meal and a neat girl in spotless apron ready to serve her and her brother in their own dining room.

Donald had sprung many happy surprises on his sister, but this crowned them all.

"Are you quite, quite sure I will not awaken to have to run out and get a few chops, a baker's cake and some vegetables for our dinner?" she

questioned Donald. Gladys reached a splendid contentment in the home of the Sinclairs. She had hours of uninterrupted concentration, Jean helped her with ad-

I thought not, and do you know what the mother cuckoo does with the time she saves by not having to sit on eggs? Does not that strike you as an important consideration? Do you feel sorry for the displaced birds and angry at the cuckoo or do you give a grudging admiration to the lazy bird that is capable of making another assume its duties? I await the answer as one which reflects your phycholog-

"Indeed, sir, I . . ." "Exactly! Well, I have seen a motion picture of the mother cuckoo watching the nest of a little field bird, biding her time that she may swoop down and deposit an egg in an alien abode. And then what? She took from that nest one of its natural eggs, carried it to a tree and devoured it. Does that suggest anything to you as a philosopher, a humanitarian, or a, a

Mr. Wilkins would have risen, but Parfinkle clapped him on the shoulder and forced him to his seat.

"My scheme is simple, I will trail the mother cuckoo. I will find her eggs. Moreover, I will advertise for cuckoo eggs, will pay handsomely for all I get and then," Parfinkle whispered now almost savagely into the Wilkins' ear, "then I will place those eggs where the new-born cuckoos, the upstart generation of feathered squatters cannot work their mischief on innocent fledglings. Do you know what I will do?" Parfinkle waited-Wilkins, staring wildly, wet his lips.

Venerable Tree

The white oak tree which was cut lown in the Daggetts' yard recently was 331 years old. It had to be destroyed because it was dying.

W. C. Coker, the botanist, ascertained its age by counting the rings in the trunk. There was 321 of them, but the count was made about ten feet above ground, and Mr. Coker estimates that the tree must have been growing ten years before the rings began to form at that height; and so he places the tree's age at 331 years. -Chapel Hill Weekly.

Immediately after lunch she got little Grace ready, then dressed herself and had hardly finished when Mr. Kellington appeared, carrying two toy balloons in one hand and under the other arm a little stuffed woolly dog with a black spot over one eye. A shiver of sheer delight ran over Miss Simpson at the sight of him, he was so splendid looking and so calm, and she felt sorry for a little sad look she often saw down deep in his eyes.
