

"Let's Fall in Love" Here May 18 and 19

Lilting tunes, songs you'll remember—and girls you'll never forget! That's the formula for "Let's Fall in Love," which will be shown at the local theater this Friday and Saturday nights.

Edmund Lowe and Ann Sothern have the featured roles. The story centers around Hollywood. A temperamental star walks off the set leaving the producer and director high, and dry. The vacated role calls for a Swedish star. None but a Swede will do—and none of the available ones are acceptable to the director.

He meets a girl in a circus concession. Struck with her beauty, he persuades her to place herself in his hands. His scheme is to foist her off on the producer as a great find. He puts her with a Swedish family where she rapidly assimilates the dialect. When the time is ripe, he introduces her to the producer as a Swedish society girl. The producer almost forces her to accept the role.

At the big reception given to celebrate the new "find," the director's fiancée exposes the girl as a cheat and an impostor. But the director has fallen in love with her and everything ends happily.

Award \$36,384 to County For Work Relief in May

Irwin Cochran, County Auditor for the County Emergency Relief Committee, recently received official notice that Champaign County has been awarded \$36,384 for May, which is believed by officials to be sufficient to furnish cash work for 500 families.

Cochran said municipalities using work relief labor are no longer required to carry a revolving fund to pay workers. The workers are now paid directly by check from the Chicago office and the checks are sent to their homes at the end of each two weeks.—Rantoul Press.

Five Former Winners Will Try Luck Again In Indianapolis 500-Mile Race on May 30th

INDIANAPOLIS, Ind.—Led by a youthful veteran driver who has twice won the annual 500-mile race and, who has been national automobile racing champion three times, five former winners will be back on the bricks of the Indianapolis Motor Speedway on May 30th.

Louis Meyer will lead the hurrying pack in quest of a portion of the \$100,000 in aggregate prize money. Meyer won the Decoration Day event first in 1928 and repeated in 1933 to equal the long-standing record of the famous Tommy Milton who won in 1921 and 1923. Meyer was also national champion in 1928, 1929 and in the racing year of 1933.

An old familiar face which will be

new to many spectators this May day will be Peter De Paolo who drove to a record-breaking victory in 1925, setting a record of 101.13 miles an hour which stood for six years. De Paolo is racing to Tripoli, Africa, on a 10,000-mile round trip which will bring him back to Indianapolis in time for the race.

Fred Frame, consistent campaigner, winner in 1932, will be back for another try as will Louis Schneider who was victor in 1931. Schneider raced in South America throughout the winter.

From out of the past will come L. L. Corum, joint winner with the late Joe Boyer in 1924 for a come-back attempt.

Fourteen ladies were present.

Shall Broadlands Have A Band?

Several from this community and from Longview are very anxious to have a band this summer and have requested Rev. Hardy to organize one. He therefore has asked us to print this notice. There will be a meeting of all those interested and can play an instrument. If enough respond Rev. Hardy is willing to do his part toward a band. He has had 20 years of experience directing bands and orchestras. A band is a great asset to any town—it livens things up because everybody loves music. This meeting will be held this Friday night at 8 o'clock in the Bergfield building.

Automobile Sales Top 100,000 Mark First Time in Three Years

Detroit, Mich., May 10.—For the first time in three years, sales of an automobile manufacturer for a single month topped the one hundred thousand mark. This was brought out today in a statement issued by William E. Holler, general sales manager of Chevrolet Motor Company, announcing retail sales of Chevrolet passenger cars and trucks during April of 100,046 units. This figure includes Canadian, export and domestic deliveries.

This compares with 59,193 units in April, 1933, and 96,893 units in March of this year, according to the statement.

Retail sales the first four months of this year totaled 231,033 as compared to 184,138 in the same period a year ago, an increase of 52 per cent.

Chevrolet's April retail sales record is considered significant in view of the fact that this company has suffered an acute car shortage, practically since the new 1934 models were introduced and only now is catching up in a small measure with the thousands of unfilled orders on its books. Retail sales were higher than for any similar period in 35 months, since April, 1931, to be exact, and this tremendous retail volume, according to Mr. Holler, is the direct result of the modern features and many unusual improvements incorporated in the new 1934 knee-action models.

Thrift and Success

Opportunities come to everyone, but often the greatest opportunities can not be grasped because it requires a little ready money to enable one to take advantage of them.

This point is emphasized by a well-known financier, who in an article on thrift, says: "Those who became leaders in the business world found the turning point in their careers when they were able to take advantage of a great opportunity because they had the money at hand. In most cases the sum of money involved was small, but coupled with vision, ambition, clean living and self-mastery, these men were able to turn their nest eggs into fortunes.

It is undeniable that the habit of saving comes hard for most people, but having once made a start it is comparatively easy to continue. Nothing inspires the confidence of business men in a young person more readily than the knowledge that he or she is able to save money, even though the amount saved from month to month is not large. Many a young man has been enabled to make a most desirable business connection through a reputation for thrift and having a little ready cash.

Looking for Ghosts

There was a large gathering of people who believe in ghosts at the International Spiritualist Congress in Paris, many of the delegates being distinguished in the material world, in addition to their claimed ability to communicate with the spirit world.

Among the proceedings was the decision to erect a monument to the Fox sisters, founders of modern spiritualism.

Continued recognition of the Fox sisters—Margaretta, Kate, Maria and Leah—who began their famous seances at Hydesville, N. Y., in 1848, appears somewhat strange, in view of the fact that Margaretta later confessed that their spirit rappings were fraudulent, being produced by their ability to dislocate their joints at will with a loud cracking noise. She afterwards appeared on the stage in many cities exposing and demonstrating these frauds. With the Fox seances as a beginning, however, spiritualism spread like wildfire and gained many adherents in America and Europe. Many eminent men have been convinced that communication with the spirits of the dead is possible.

The great body of scientific men, however, are skeptical, while generally maintaining an open mind regarding this, as they do concerning other ideas and theories which have not been definitely proved to be erroneous. In the light of present knowledge most rational persons consider spiritualism as plain bunk.

Small Town Factories

No community and no state ever became fully prosperous through agriculture alone, declares T. R. Preston, former President of the American Bankers Association, who is a strong advocate of combining industry with agriculture by locating factories in the smaller communities.

Mr. Preston cites particularly

the small cities and towns of North Carolina, Pennsylvania and Ohio as affording excellent examples of such combination. He points out that industry and agriculture are well balanced with the result that the farm problem is less acute in those states.

The idea of locating new factories in towns and villages, instead of further concentrating them in congested centers of population, is spreading throughout the country, and some of the largest factories are now so located. An example is Kingsport, Tenn., with only a few thousand population, yet boasting the largest book printing plant in the world, besides other important industries.

The benefits derived from this decentralization of industry is seen in an increased market for local farm products, employment of surplus labor, elevation of living standards for both farmer and factory employee, increases in taxable wealth, better schools and other public facilities.

Interesting Notes

Until the nineteenth century, bananas were not known outside the tropics, except by reputation.

An ink made with ammonia instead of acid is said to have virtually no deteriorating effect on paper.

Miss Burgess Leach, a young woman of Portland, Ore., is said to be the first woman in this country to study for an aviation mechanics license.

An eight-year-old boy, Bernard Dublin, of New York City, was arrested for stealing \$25 from a shoe store cash register.

Chewing Mechanic Now Leaves Tobacco Home

INDIANAPOLIS, Ind. — J. W. "Jigger" Johnson, colorful riding mechanic, will leave his chewing tobacco in the pits when he rides in the 500-mile race this year. It almost cost his driver victory in a previous contest.

Johnson, a short, wiry chap as nervous as a bucket of worms, will sit beside pilot A. B. "Deacon" Litz in the Decoration Day classic at the Indianapolis Motor Speedway on May 30.

It was back in 1931 that "Jigger" left off tobacco-chewing while at work. He was riding with Louis Schneider. Billy Arnold had been leading all day and setting his usual terrific pace. At 400 miles Billy went through the wall and shortly afterward Tony Gulotta, who had succeeded Arnold as leader, spun in the oil of the Arnold wreck and went out of the race. Shortly afterward Schneider found himself out front, headed for victory. He steadied down to a safe pace which would bring him in.

"Jigger," elated with the prospects, popped a nibble of tobacco into his mouth. Shortly afterward, a few drops of the brown juice smeared Schneider's goggles. It looked like oil.

"What's leaking! What's leaking!" screamed Schneider, reaching for the breaks, prepared to stop.

"Just my mouth," replied "Jigger."

Schneider's discourse on chewing tobacco immediately after the race was not recorded.

**Radio Telephone Will Afford Communication
Between Speeding Race Car and Its Base**

INDIANAPOLIS, Ind.—Speed will again talk with the “land of standing still” this year when a car equipped with a two-way radio telephone will compete in the annual 500-mile race at the Indianapolis Motor Speedway on May 30th.

Alden Sampson II attempted the experiment last year with a great measure of success. For more than two-thirds of the distance Sampson, in the pits, forsook the traditional black board and talked back and forth with his driver, Chet Gardner, as Chet whirled around the two and a half mile brick track at a speed of more than 101 miles an hour. Gardner, ear pieces built in his head gear and mouth piece dangling in front of him, told the pits of his fuel and tire needs and his pit crew in return informed the driver of his time and position. Gardner was also kept posted upon the positions of other cars and maintained his pace nicely throughout the day. He finished in fourth place.

The terrific pounding of some 350 miles, however, caused a tube breakage. Sampson has been conducting further experiments throughout the past year and believes that his car will travel the entire distance on Decoration Day under radio control.

**Speed Kings Race Before Varied Crowd
At Annual 500-Mile Classic on May 30th**

INDIANAPOLIS, Ind.—The valiant of speed play to a cosmopolitan audience when they roar around the Indianapolis Motor Speedway on May 30th in the annual 500-mile automobile race.

Kings of industry rub shoulders with modest garage owners. Automobile manufacturers exchange gasps with filling station operators. Queens of society match thrill for thrill with the little waitress who has saved her dimes to watch her favorite in the Decoration Day classic.

From the cross roads of the country come those motor caretakers of the nation to worship at the shrine of speed and from the automotive laboratories of America come the creators of power plants to observe engines in their most severe test.

A great sports audience sits in the huge stands to watch the thrilling event and, a smaller audience of technical experts, representing the cream of the automotive industry, is on the alert back of the pit walls awaiting the success or the failure of some new experiment which may mean much to the standard automobile.

Speed is the only King at Indianapolis on May 30th.

1. Henry Ford and Harvey Firestone.
2. Gar Wood, fastest man on water.
3. Louis Schneider, 1931 winner, takes Battling Nelson, famous prize fighter, for a spin.
4. Morton Downey, famous tenor.

Fair Visitors to Explore 'Lost River'

Visitors to the new World's Fair which opens in Chicago May 26 will float, in a boat pushed by a prehistoric man, down the “Lost River” through the world of a million years ago in this new exposition feature located on the new Beach Midway. This is one of all the new, startling features offered to Fair visitors this summer, at low cost. The prehistoric monsters reproduced will be animated, in some cases by as many as sixteen motors. They will move, hiss and roar. There are ample tourist accommodations and parking space adjacent to the Fair.

"No Roosters Allowed"

When it comes to surplus roosters, that will be the NRA slogan for Champaign County farmers on Thursday, June 7, which is the date for Urbana's annual Rooster Roundup. This roundup will be held in cooperation with the poultry husbandry extension division of the University of Illinois. More than double the pickup price for roosters at the farm will be paid that day by the retail trade division of the Urbana Association of Commerce and David's Produce Co., of Urbana.

Rooster day will be one feature of a three-day trade event that will be held by Urbana retailers that week-end.

On Its Tip-Toe Wheels It Set a New Standard of Farm Power

The Oliver Hart-Parr Row Crop with its 18 horse power draw-bar pull, operating through its tip-toe wheels has set a new standard of farm power for row crop and diversified farming.

The wheels are narrow—the axle high—the equipment mounted so that you can work right up to the end of the row—but without disturbing the growing crops. Rear wheel brakes, that operate with the steering wheel give the Row Crop quicker, closer control.

The cultivating and planting equipment, in practically all cases, is mounted ahead of the operator, so that he always has a full view of the work. The ability of the gangs to both float and penetrate independently gives an evenness of planting and cultivation unknown in tractor work before. The tip-toe wheels give positive traction. They pack the soil so very little that a spike harrow completely removes their tracks.

Don't go into this season until you see it—the Oliver Row Crop—on its tip-toe wheels with complete equipment.
