VOLUME 16

BROADLANDS, ILLINOIS, THURSDAY, MARCH 19, 1936

NUMBER 47

Everett R. Peters For Representative

In an interview with Everett R. Peters of St. Joseph, our representative from the 24th Senatorial district, he stated that he is a candidate for renomination and reelection.

Mr. Peters has made a most excellent record as a first term in the House and points with pride to his voting on the various bills that came up during his term of office. He states that anyone interested enough to investigate his voting record at Springfield will find that he worked for and supported all good legislation and opposed all that he believed to be unsound.

He was one of the minority party who vigorously opposed the increase in sales tax on the grounds that it was not needed, and that with a little economy on the part of the state government, there would have been plenty of money to take care of all relief needed anywhere in the state.

He opposed and voted against the "Licensing of Handbooks," bill which was the state's first attempt to legalize gambling. Mr. Peters was not in favor of this and felt he was also voting the wishes of his constituency.

Mr. Peters was one of the down state members who strenuously fought for and voted to enact the "Permanent Registration" bill for Chicago at both the regular and special sessions of the legislature. This bill was known as "The Honest Election Law" and if it had passed would have insured to Illinois honest elections.

He also supported the "Insurance Code," which would have given a greater measure of protection to all life insurance policy holders if it had become a law.

The "Old Age Pension" law was considered by him as a most important piece of legislation and he not only worked for it in committee but voted yes when it came up on the floor of the House. This bill allows \$15 per month to all people over 65 years old, which it is understood will be augmented by another \$15 from the Federal Government.

He was an active worker and championed the bill which was passed that increased the State School Distributive fund. This has been a great boon to many of the smaller districts.

Mr. Peters introduced and favored several bills in the interest of his own district, the principal one being the U. of I. Appropriation bill which was passed in its original form after various attempts had been made to amend and cut off \$900,000. It was noted at the time of the passing of

this bill that Mr. Peters was largely instrumental in its passage and the daily papers at that time carried some very complimentary articles concerning his part in the passing of this bill.

Methodist Aid Entertained at Home Mrs. Fitzgerald

Mrs. Mary Fitzgerald, Mrs. Emma Jackson and Mrs. Anna Seeds entertained the Methodist Ladies Aid on Thursday afternoon of last week at the home of Mrs. Fitzgerald.

The meeting was conducted by the president, Mrs. Daisy Gore, and was opened with the song, "I Need Thee Every Hour." The devotional was led by Mrs. Eva Brewer, the subject being, "God's Love," which was followed by the Lord's prayer in unison.

The refreshments consisted of green and white sandwiches, overnight salad with whipped cream, mints, coffee, and shamrock favors with marshmallows.

Members present were Mesdames Leanna Miller, Nellie Astell, Daisy Gore, Lettie Eckerty, Edna Dicks, Edna Telling, Eva Walker, Frances Smith, Eva Brewer, Ida Messman, Mildred Neal, Helen Eckerty, Yuba Catlett, Helen Nichols, Bertha Cook, Maude Moore, Ruth Thode, Mary Dicks, Alma Bruhn, Cora Chafin, Emma Jackson, Anna Seeds, Mary Fitzgerald. Mrs. Marie Krenzien was a guest.

This Week's Movie Program

The following program will be given at the Broadlands Theater, this Friday and Saturday nights:
Feature—Will Rogers in "Doubting Thomas."
Comedy—Tars and Stripes.
Fox Movietone News Reel.

M. E. CHURCH NOTES

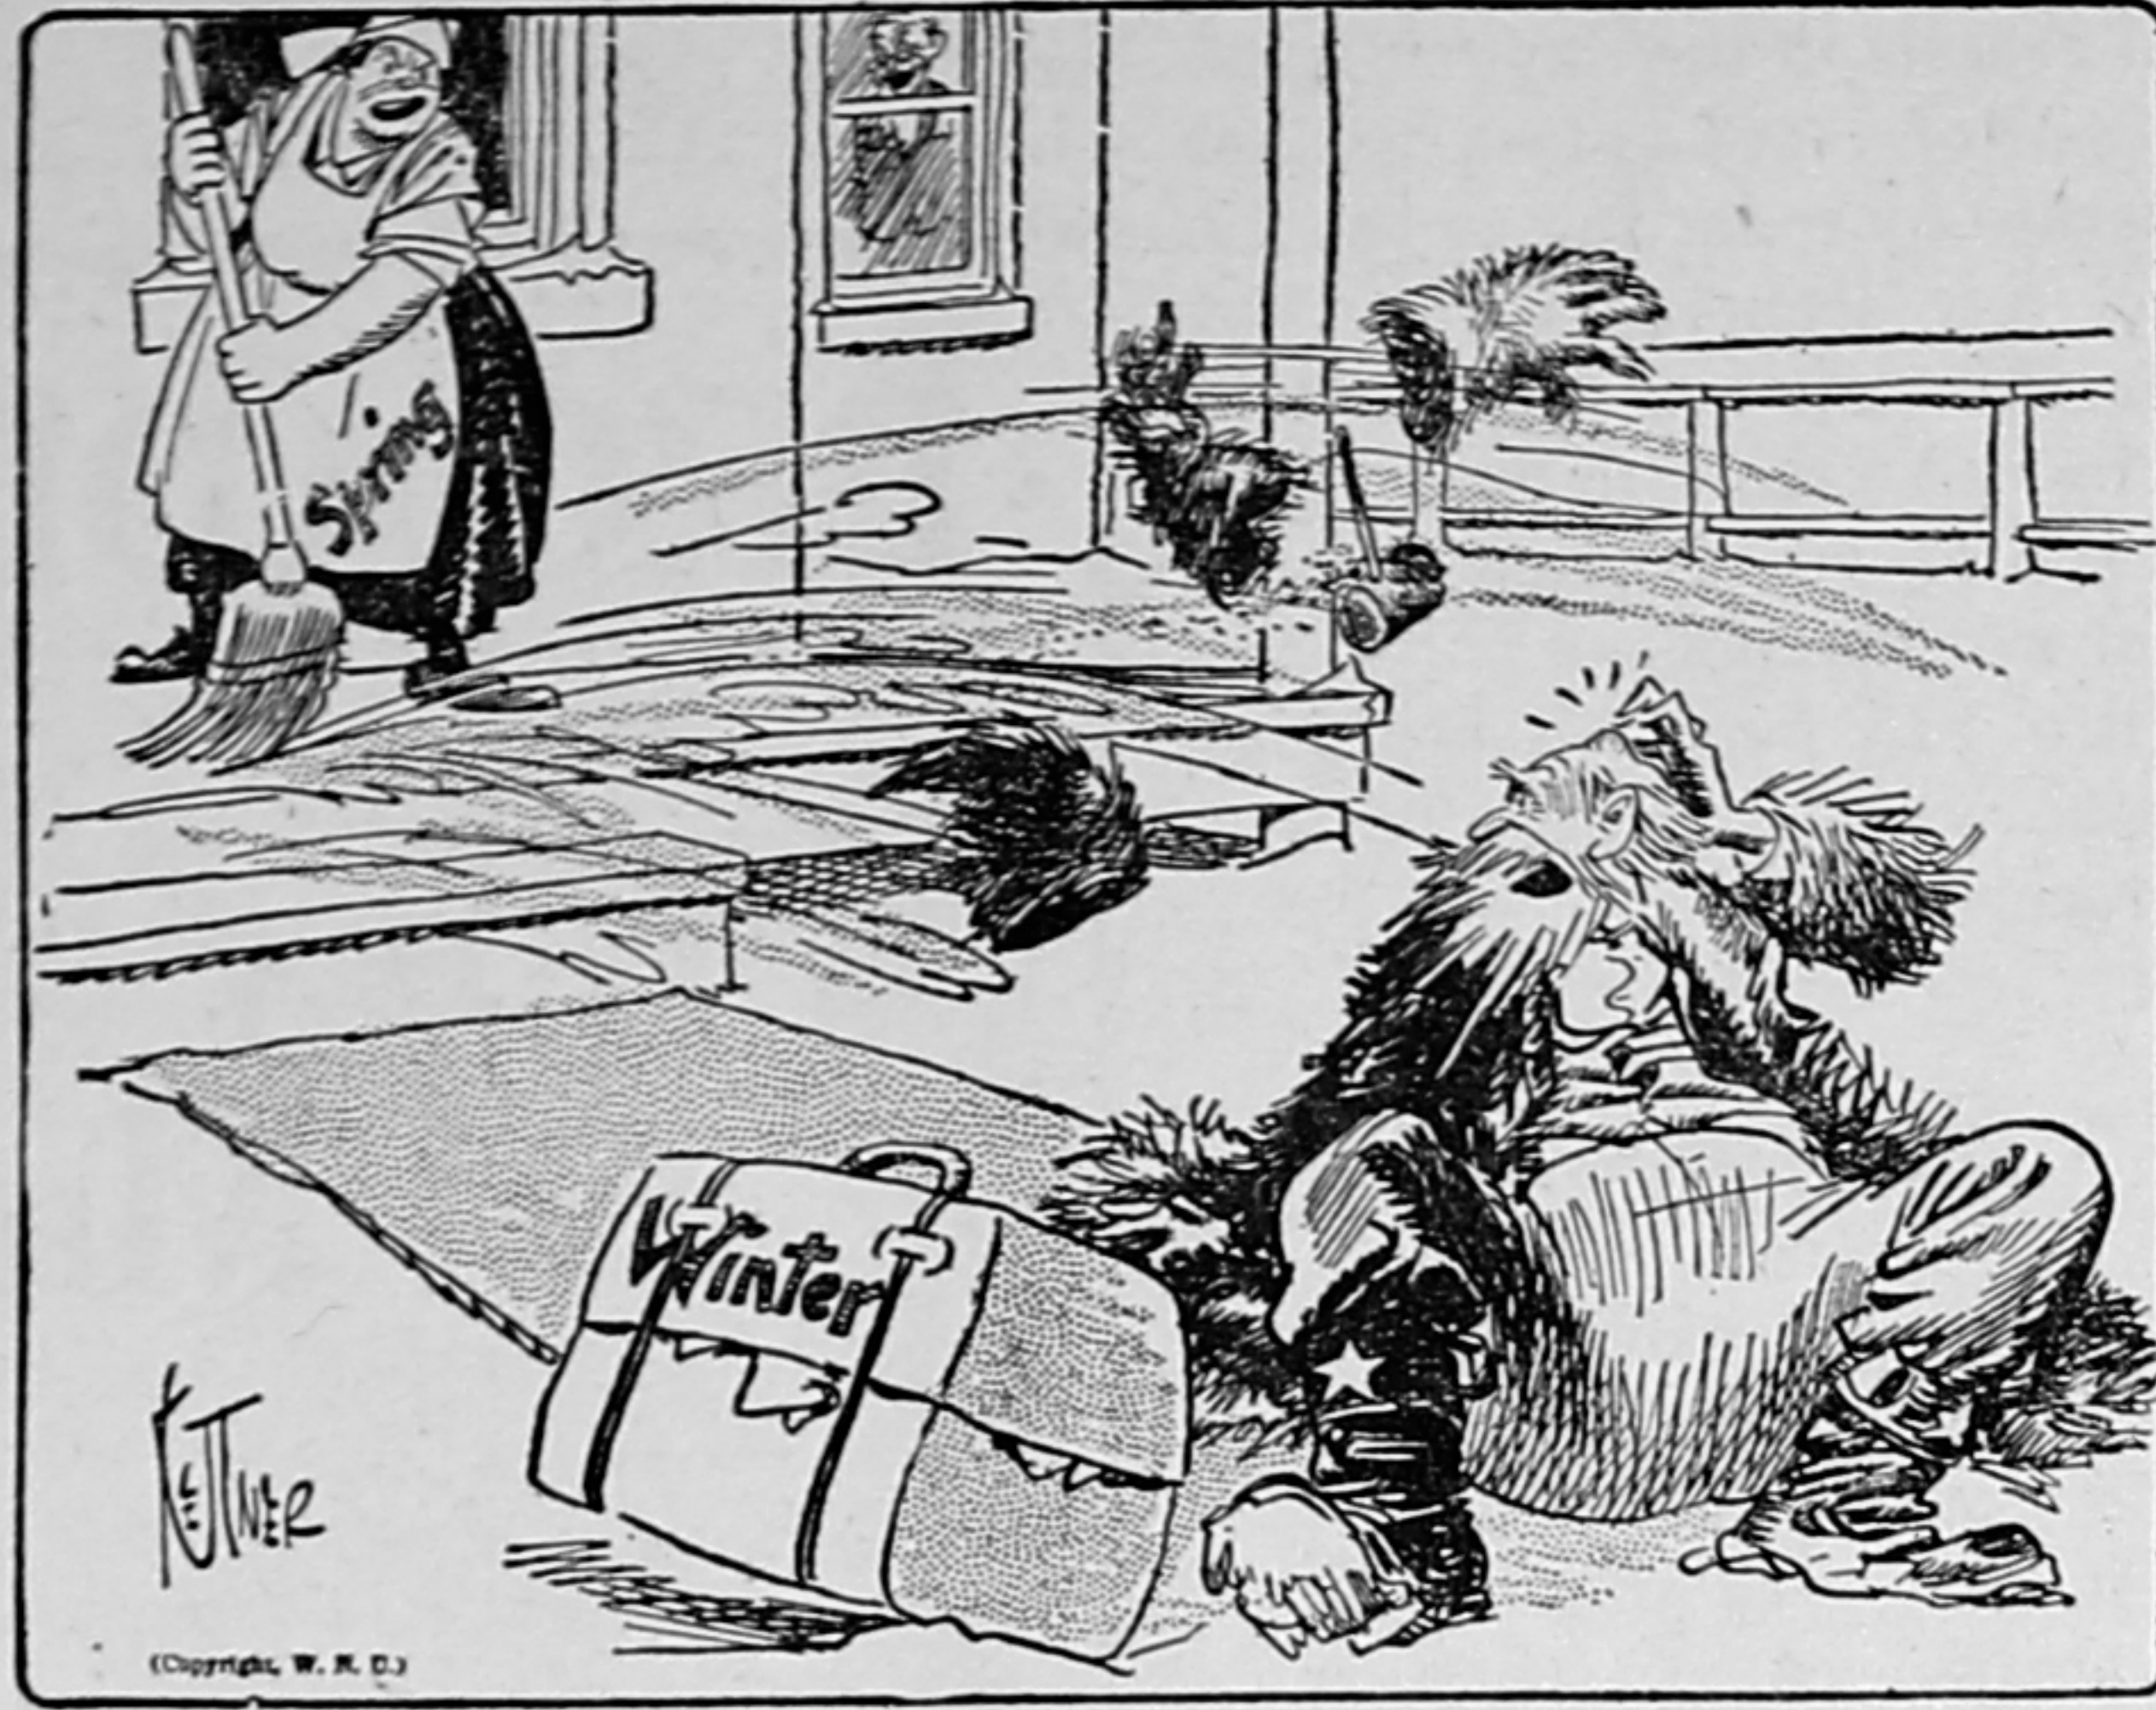

W. Earl Ballew, Pastor
The Sunday School meets at 10 o'clock.
Why not all the family come?
Preaching Service next Sunday is in the morning, at 11:00. We are leading up to Easter. The sermons are Lenten messages. Subject: "Renewing Your Mind."

St. John's Evangelical Church

ROBERT J. BALDAUF, PASTOR.

Local and Personal Local and Personal

Mrs. Mark Moore was a Champaign visitor, Saturday.

Mr. and Mrs. George Walker were Sidney visitors Wednesday.

Miss Judy Craig of Newman spent last week-end with Mr. and Mrs. Harlan Craig.

Mrs. A. A. Cable spent the past week with relatives at Chicago and Steiger.

Barney Thode and family of Sidney were guests at the home of B. H. Thode, Sr., Sunday.

O. E. Anderson has been confined to his home by illness since Sunday.

John M. Smith and family visited friends at Champaign, Sunday.

Bud Struck and Harold Anderson were Peoria visitors, Tuesday.

Mr. and Mrs. Henry Kilian, Jr. were Newman visitors on Tuesday.

Mr. and Mrs. Dwight Haines of Hume spent Sunday evening with Mrs. Mabel Haines.

Kenneth Dicks and Roy Bergfield made a business trip to Harrodsburg, Ky., Tuesday.

Miss Gaile Potter spent the past week with Miss Leone Bergfield.

Mr. and Mrs. Perry Starkey of Pesotum were week end guests of Mr. and Mrs. George Cook.

Mr. and Mrs. Howard Clem were Champaign visitors on Tuesday.

Mrs. Le Roy Hobbs and son Tommy, of Indianapolis, spent Sunday with Dr. and Mrs. T. A. Dicks.

Jess Ward and family, Mrs. Anna Neal and children spent Sunday with friends at Champaign.

Mrs. Henry Kilian, Sr., Mrs. Henry Schumacher and Mrs. Walter Witt were Champaign visitors, Tuesday.

Mesdames Louis Frick and Bud Struck visited Mrs. Oscar Limp and baby at St. Elizabeth Hospital, Danville, last Friday.

Supervisor F. A. Messman attended a meeting of the hard road committee of the board of supervisors at the county seat, Thursday.

A light snowfall visited this section on Thursday of last week.

Little Elaine Cooper of Tuscola spent the weekend with her grandparents, Mr. and Mrs. D. P. Brewer.

Howard Clem and Miss Anna Clem visited their brother, Herbert Clem at Lakeview Hospital, Danville, Wednesday.

Mrs. D. P. Brewer, son Carlos, Charles Brewer, Mr. and Mrs. Floyd Block were supper guests of Mr. and Mrs. Leslie Cooper at Tuscola, Sunday evening.

Fred Eckerty and Miss Juanita Bergfield accompanied the former's grandfather, G. W. Thomas to his home at Paoli, Ind., on Sunday. They returned Tuesday.

Jim Young of Bismarck and John Smith of Broadlands were buying horses at Kansas, Paris and Charleston last week, having purchased a truckload.

Mr. and Mrs. D. P. Brewer and Charles Brewer attended the funeral of Mrs. John Kearns at Camargo last Sunday afternoon.

Mrs. Charles Walker entertained at a birthday dinner for her husband, Sunday, Frank Boyd and family of Kansas, Mrs. Minnie Boyd, Charles Boyd, Mr. and Mrs. George Walker.

Word has been received here that Mr. and Mrs. Alvin Zenke and Mr. and Mrs. Robert Smith who have been sojourning in Florida expect to start home on Sunday.

The Broadlands Cooperative Seed Association has certainly been a busy place the past three weeks, having germinated about 500 bushels of seed corn for farmers of this locality. Henry Kilian, Jr., is manager of the association.

Mrs. Harlan Craig is Given Shower

Mrs. Norman Seider entertained at a miscellaneous shower in honor of Mrs. Clara Haines Craig, recent bride, Wednesday evening of last week. Assistant hostesses were Mesdames Edward Hogan, Catherine Fagenbush, Dwight Haines and Mabel Haines. Seventy-five guests were present.

A program consisting of a mock wedding, songs and readings was enjoyed.

Refreshments were in keeping with St. Patrick's Day.

Lure of Highways May Bring Disaster

The lure of the highways in the spring may bring disaster to the motorist who fails to concentrate on his driving, cautioned Secretary of State Edward J. Hughes in a safety bulletin issued today.

Motorists should exercise unusual care at this time of the year, said Mr. Hughes. Statistics indicate an increase in the number of automobile accidents in the spring, due largely to inattention at the wheel, excessive speed and congested highways.

There is a tendency on the part of some drivers when the weather is clear and balmy, to reflect a care-free attitude in the manner in which they drive. Ideal driving conditions apparently tend to lull the driver into a false sense of security.

According to Mr. Hughes, more than eight out of every ten motor vehicle accidents reported in the United States last year occurred during clear weather and approximately three-fourths of all accidents happened while motorists were operating on dry roads.

In conclusion the bulletin urges motorists to be ever watchful for children who at this time of the year are prone to play upon the streets and highways.

News Items of 12 Years Ago

March 21, 1924

A daughter was born to Mr. and Mrs. Sanford Harvey.

Mrs. Lucy Sullivan of Homer visited relatives here.

Charles Gilbert left for Canada to resume farming.

Harold Kesterson visited relatives at Charleston.

Joseph Bixler purchased an 80 acre farm at Dewey and moved to that place.

Mrs. Sue Harden gave a party for her daughter, Patricia, on her ninth birthday.

The local highs defeated the Westville quintet at Westville, 16 to 14.

Market Report

Clifford Eckertys Surprised; 30th Wedding Anniversary

The home of Mr. and Mrs. Clifford Eckerty was the scene of a happy gathering last Wednesday evening when a large number of relatives and friends gathered at the Eckerty Cafe to remind them of their 30th wedding anniversary.

The refreshments consisted of sandwiches, fruit salad and cake, brought by the guests.

Those present were Charles Eckerty and family, Floyd Eckerty and family, Kenneth Eckerty and family, Mr. and Mrs. Dan Thomas, Charles DeWitt and family, all of Newman; Delbert Warnes and family, Mrs. Phoebe Mavity, Mrs. Ella Eckerty, Mrs. Reed Hales and children, all of Longview; Mr. and Mrs. Charles Wilson, John Milan and family, Mr. and Mrs. Noble Brooks, Mrs. Oscar Dornblazer and son, Oscar Grofton and family, Mr. and Mrs. Frank Eagler, all of Hume; Earl Eckerty and family, Mr. and Mrs. George Cook, Miss Juanita Bergfield, Mr. and Mrs. Clifford Eckerty and Fred Eckerty, all of Broadlands.

Longview High School News

Marcelle Nohren, Reporter
The basketball boys are attending the State Tournament at Champaign this week.

Practice has begun on the Junior play. Practice has also begun on the pageant, "Home Life of Today." The cast will be given next week.

Miss Marcelle Nohren entertained Miss Storm, Miss Bisson, Miss Howard, Marjorie Hedrick, Fauniel Harden and Donna Akers at dinner Wednesday evening.

An Armenian spoke at the High School Wednesday afternoon. He gave an account of his life experiences which was very interesting. He also showed his audience some foreign costumes which he had with him.

Last Friday a short program was held in front of the assembly:

Origin of St. Patrick's Day—Marcelle Nohren.
Song, Sidewalks of New York—Assembly.
Song, Peggy O'Neil—Assembly.
Song, When Irish Eyes Are Smiling—Kathryn Warner.

Following the program a contest was held to see which student could get the most three letter words out of Saint Patrick's Day. Betty Ruth Raymond won the prize.

Dumping Grounds Will Open Saturday, March 28

Notice is hereby given that the local dumping grounds will be opened on Saturday, March 28, and will remain open each Saturday through the month of April. The dumping of garbage only will be permitted.

His One Oversight

This is the story of a prudent man, as told by a Kansas Newspaper:

He brushed his teeth twice a day, wore rubbers in wet weather, did his daily dozen, slept with windows open, was careful with his diet, had a medical examination twice a year, never smoked, drank or indulged in any kind of excesses. He was all set to live to be 100 years old.

The funeral was held last Wednesday. He is survived by 18 specialists, four health institutes, six gymnasiums, and numerous health foods and anti-septics.

He had forgotten to look out for a train at a grade crossing.

Better Get Married

If statistics recently compiled by Dr. William F. Ogburn of the University of Chicago are to be accepted as accurate, those who desire to retain health, sanity, and even life itself, should get married if they are not that way already.

He declared that most of the inmates of poorhouses and insane asylums are unmarried; also that the death rate for single men and widowers is twice as high as that for married men.

It has often been asserted that married men live longer, but a cynic once declared that this was not literally true, as "it only seemed longer." However Dr. Ogburn's researches seem to bear out the idea that married life is really conducive to longevity.

To be on the safe side, therefore, a young fellow had better get married; provided, of course, he can find someone who is willing to assume the role of party of the second part—or maybe it's the first part.

Some Big Salaries

As provided by the revenue of 1934, the Treasury Department has recently issued a report giving the names of persons drawing salaries of more than \$15,000 a year, of which there are some 18,000. A few of the highest salaried ones are listed as follows:

William Randolph Hearst heads the list with \$500,000, while Mae West drew \$340,000, and Walter Gifford, president of the American Telephone and Telegraph Company, received \$210,000.

No more movie stars received a salary approaching that of Miss West, but some of them did very nicely. Bing Crosby received close to \$200,000, Constance Bennett drew \$176,000, W. C. Fields was paid \$155,000, Marlene Dietrich got \$145,000, and Gary Cooper received nearly \$140,000.

Walt Disney of Mickey Mouse fame is listed as drawing only \$51,000 salary in 1934, but his returns from royalties probably netted him a very large sum in addition.

Perhaps the highest paid person in the United States for several years has been George W. Hill, president of the American Tobacco Company, whose salary and bonuses combined ran between \$600,000 and more than a million dollars annually.

The question naturally arises as to whether any man is really worth that much money, but Mr. Hill's stockholders and directors seem to think so, and his

company has made large profits all during the depression.

Unclaimed Millions

In view of the conditions which have prevailed the last few years it would seem that almost anyone who had ready money available would be inquiring about it, especially if it were not producing any income.

Yet the treasurer of the United States some time ago stated that more than 38 million dollars due American citizens as principal and interest on matured Liberty bonds and Victory notes remained unclaimed in the treasury.

Many theories are advanced concerning this seeming indifference on the part of holders of these government obligations, each of which may be correct as to certain portions of the large sum involved.

Some of these bonds and notes have doubtless been destroyed by fire or otherwise, others have been hidden away and forgotten, still other holders do not know that their securities have been called for redemption, while some know they can get their money but prefer to leave it with Uncle Sam.

It has been rumored that a good many purchasers of Liberty bonds thought they were simply donating the amount paid to help the country win the war, and at least one case is known in which the holder of a Liberty bond inquired of the treasury to find out when he must pay interest on it.

Whatever the reason for not presenting these bonds and notes for payment, the government is not doing the worrying. If no claim is made for any amounts due, the treasury is just in that much.

The Ice Patrol

It sometimes takes a great disaster to awaken a community or nation to the fact that a known menace to life and property often may be removed through intelligent action. Such was the lesson of the Titanic, sunk thru collision with an iceberg on April 14, 1912, with a loss of 1,517 lives.

This shocking tragedy of the sea aroused a demand for precautionary measures, resulting in the formation of the international ice patrol to watch for and report icebergs in the North Atlantic steamer lanes during the dangerous season of each year,

which is in the late spring and early summer.

Ten nations joined in bearing the expense, the patrol duty being performed by United States Coast Guard cutters. This control has been maintained each year since the Titanic disaster, with the exception of two years during the war.

Two cutters are employed each year, using Halifax as a base, and they send out information of icebergs sighted, this information being transmitted by radio to all vessels in the danger zone. Captains of vessels of all nations cooperate by reporting to the ice patrol any icebergs sighted by them, this data also being broadcast by radio twice daily.

In the 24 years since the ice patrol was established not a single life has been lost through collision with icebergs. Truly a fine record.

Sidelights

Aptitude for some sport or other has often changed a young man's career. An example is seen in the case of Bill Starr, who started out to be a rabbi and wound up as a catcher for the Washington Senators.

Chris Hansen of Champaign, Ill., is 97 years old, has been blind more than 50 years, and says he attributes his long life to temperance in all things and refusing to worry. The fact that he got married when he was 77 also may have helped.

Speaking of candidates, the most optimistic one we have heard of this year is Howard M. Overstreet of Washington, D. C. who has quit his job as a policeman in order to seek the Democratic nomination for President of the United States. It will be quite a jump if he makes it.

The Miami juvenile court is disturbed over how to dispose of triplet babies who came under its charge when their mother deserted them. The mother at different times named two men as their father. Strangely enough, both men want to marry the mother. The case is even more baffling than the famous one which once taxed King Solomon's wisdom.

Even if we could see ourselves as others see us we probably wouldn't believe our own eyes.

The Marriage Problem

By S. HOPKINS ADAMS
Author of "Siege," "The Clarion,"
"A Bench in Our Square," etc.

Woman Will Decide the Future of Marriage

A CENTURY forward is a much longer period than a century back. We are covering so much more ground per year than we used to. The Nineteenth century was an easy, logical, jog-trot progress. Toward the end the pace accelerated, and got pretty lively in the opening years of the Twentieth.

Now we are in a race in which we are sloughing off a lot of burdensome impediments in order to go the faster.

Systems go into the discard where before only methods were supplanted. Whether marriage will be among the lot is one of the vital questions. I should say that the women will decide it.

Woman invented marriage. Nature had rather unfairly wished on her all the bothersome features of the job of race perpetuation, and she naturally began to figure how to carry on with the least trouble to herself, her strategy taking form some time before the beginnings of history, in a self-protective scheme for stabilizing the home.

The simple process of mating became systematized into the complex responsibility of marriage on that dim but profoundly historic day when the first articulate woman announced to the first surprised and disconcerted man: "This is your child as much as mine. Now you go out and hustle grub for the family and see that you get home before dark, or some fine evening you'll find the rock in the cave door, the fire in the creek, the bobcat tied to the tree and me and the kid gone home to mother."

Arbitrary stuff this; but the dawn-of-civilization lady made good because there were so few of her that she was in a position to dictate. By and by she got her useful formula adopted as tribal custom, and from that to the formality and authority of law was an easy step. Then religion came along and said: "This is my affair," thereby adding the weight of its power to ban and bless.

The question is: Does she want to stay fixed? Consider the fact that for all these cons she has both established and accepted her role as an exclusively child-bearing, house-cleaning mechanism, with, of late centuries, a certain added esthetic rating.

But some time in the last century a new feminism thrust forth its enlightened (or baleful—take your pick) head. It entered woman as a contestant in the economic free-for-all stakes and asked no handicap.

Universities, doctorates, clans, sects and professions tried to bar her; but, having successfully achieved wifehood a million years or so before, she now made an equal claim to spinstership, and established it.

She now offers the cataclysmic and wholly unhistoric spectacle of the female who frankly does not regard a wedding ring as a halo or the orange blossom as the one authentic perfume of paradise. She has other things to think about.

Which is not intended to mean that she does not think about marriage. She thinks about it interestedly and deeply, and I suspect that at the bottom of her thought—I am speaking now of the typical modern-minded woman of eighteen to eighty—is the surmise as to whether she needs it any longer.

To cut loose from it would be a tremendous venture indeed. To that type of mind which believes that because a thing always has been it always will be such an innovation is unthinkable.

Perhaps a chief mark of modernity is that changes have ceased to be convulsions or even, necessarily, heresy. Only a short time ago, as history goes, it was treason to change nationality, hell fire to change religion and bad form to change wives. Now we manage these things perhaps not better, but more smoothly.

If we—that is to say, if women—determine to alter the whole scheme and basis of matrimony between now and the Twenty-first century, they will at least be able to try it without fear of jail or damnation or of ostracism.

Whether we like it or not, the two sexes are rapidly reaching a common basis of existence, with common standards, though the change is all on one side.

Their daughters, granddaughters and further descendants may carry on the banner or they may revert toward the old femaleness of type. One man's guess is as good as another's and any woman's better than either. For as woman contrived, so she can alter or destroy marriage at her will. And, unless all signs fail, she is likely to decide before this busy century is done.

The event is on the knees of the goddesses.

Public Ledger, Inc.—WNU Service.

HOME CANNERS WARNED AGAINST FOOD POISONING

Only Reliable Information Should Be Used, Says U. of I. Authority.

Many outbreaks of botulism (food poisoning), all caused by home-canned foods, was charged to state agencies and certain types of publications because of their failure to properly inform homemakers of the correct methods of canning foods, by Prof. Fred W. Tanner, head of the University of Illinois department of bacteriology.

No outbreaks of botulism have been attributed to factory-canned food packed in America since 1925. Dr. Tanner pointed out, and asserted that the art of food preservation by canning in the factory has never been on a sounder basis than today.

"This statement becomes still more significant," he said, "when the relatively small amounts of home-canned foods in contrast to the large amounts of factory-canned goods are considered."

"Although the U. S. Department of Agriculture has placed itself on record very emphatically as opposed to the use of methods known to be dangerous, and distributes a reliable publication to the home canners in Farmers' Bulletin 1471, only 10 extension services connected to state agricultural experiment stations have seen fit to adopt similar recommendations.

"Many publications of manufacturers of canning supplies for the home-maker are unsound bacteriologically," he said, "and may mislead a home-maker into situations where she may not only subject her family to serious health hazards but pack a product which will show high incidence of spoiling when stored under average conditions in the home."

"Since excessive spoilage of canned foods can be curbed by adequate processing, home economics experts should give advice which will result in a sound product," Dr. Tanner explained.

"The boiling-water process for non-acid foods and meats should be abandoned as a wasteful, dangerous method," he warned.

"Even processing of non-acid foods should be abandoned, since it results in preserved foods which will not keep."

The steam-pressure cooker—and no other methods—should be used for the canning of non-acid foods, he explained.

"Until preservation of perishable food products by heating in wash-tubs, wash-boilers, lard cans, and other such containers is entirely eliminated, outbreaks of food poisoning will continue. Health officers and others can play an important role in directing attention to sound practice for preservation of foods by canning in the home," he said.

For a short time we are offering 500 sheets of writing paper, size 8 1/2 x 11, for 50c.—The News.

Interesting Notes

Mrs. Ella Cannon of Brooklyn was fined \$50 for kicking a policeman.

Miss Anna Nelson, now an executive and fashion designer of one of New York's most famous stores began as an errand girl.

Stephen Yankoudes tied a large kite around his waist, a stiff breeze came and the coast guards rescued him 100 yards from Long Island Sound shore.

Sonny Cheek, 11, of Tarboro, N. C., tumbled over a banister while walking in his sleep and fell 30 feet. No bones were broken.

Eugene Fischel, a schoolboy of Manchester, Ia., promptly killed a 3-foot rattlesnake before it could strike Mrs. Jacob Melchert who drew it from her clothespin bag.

A well which he drilled for water produced for A. L. Huss, of Billings, Mont., a mysterious gas which he asserts will extinguish any fire placed near it. Tests proved the gas was not carbon dioxide.

"Surprise!" cried Mrs. Mary Kleinfehn's 10 children when they gathered at her home in New Hampton, Ia., for a family reunion. Surprise! answered Mrs. Kleinfehn, 80, as she handed each one a \$500 check.

Three boys, charged with

burglary, came before Judge Meade in Kansas City, Kan. The judge asked them if they knew the Lord's prayer. They answered "no." The judge had them learn it.

For 90 days Leo Smith, 90 of Sioux Falls, S. D., dares not drink alcohol, must stay away from the business section, unless accompanied by his wife, and all pay checks must go to Mrs. Smith. If he fails he must go to jail.

University Enrolls 14,036 for Year

The total University of Illinois enrollment of resident students for the year is 14,036, it was announced by Registrar G. P. Tuttle.

The figure includes registration for both the Chicago and Urbana-Champaign departments, as well as 2,793 who attended the summer session but who were not enrolled during either of the other semesters. The total summer enrollment was 2,719 in Urbana and 74 in Chicago.

The figure for the down state departments is 12,917 and for Chicago 1,119 for the entire year. The total includes 9,951 men and 4,085 women.

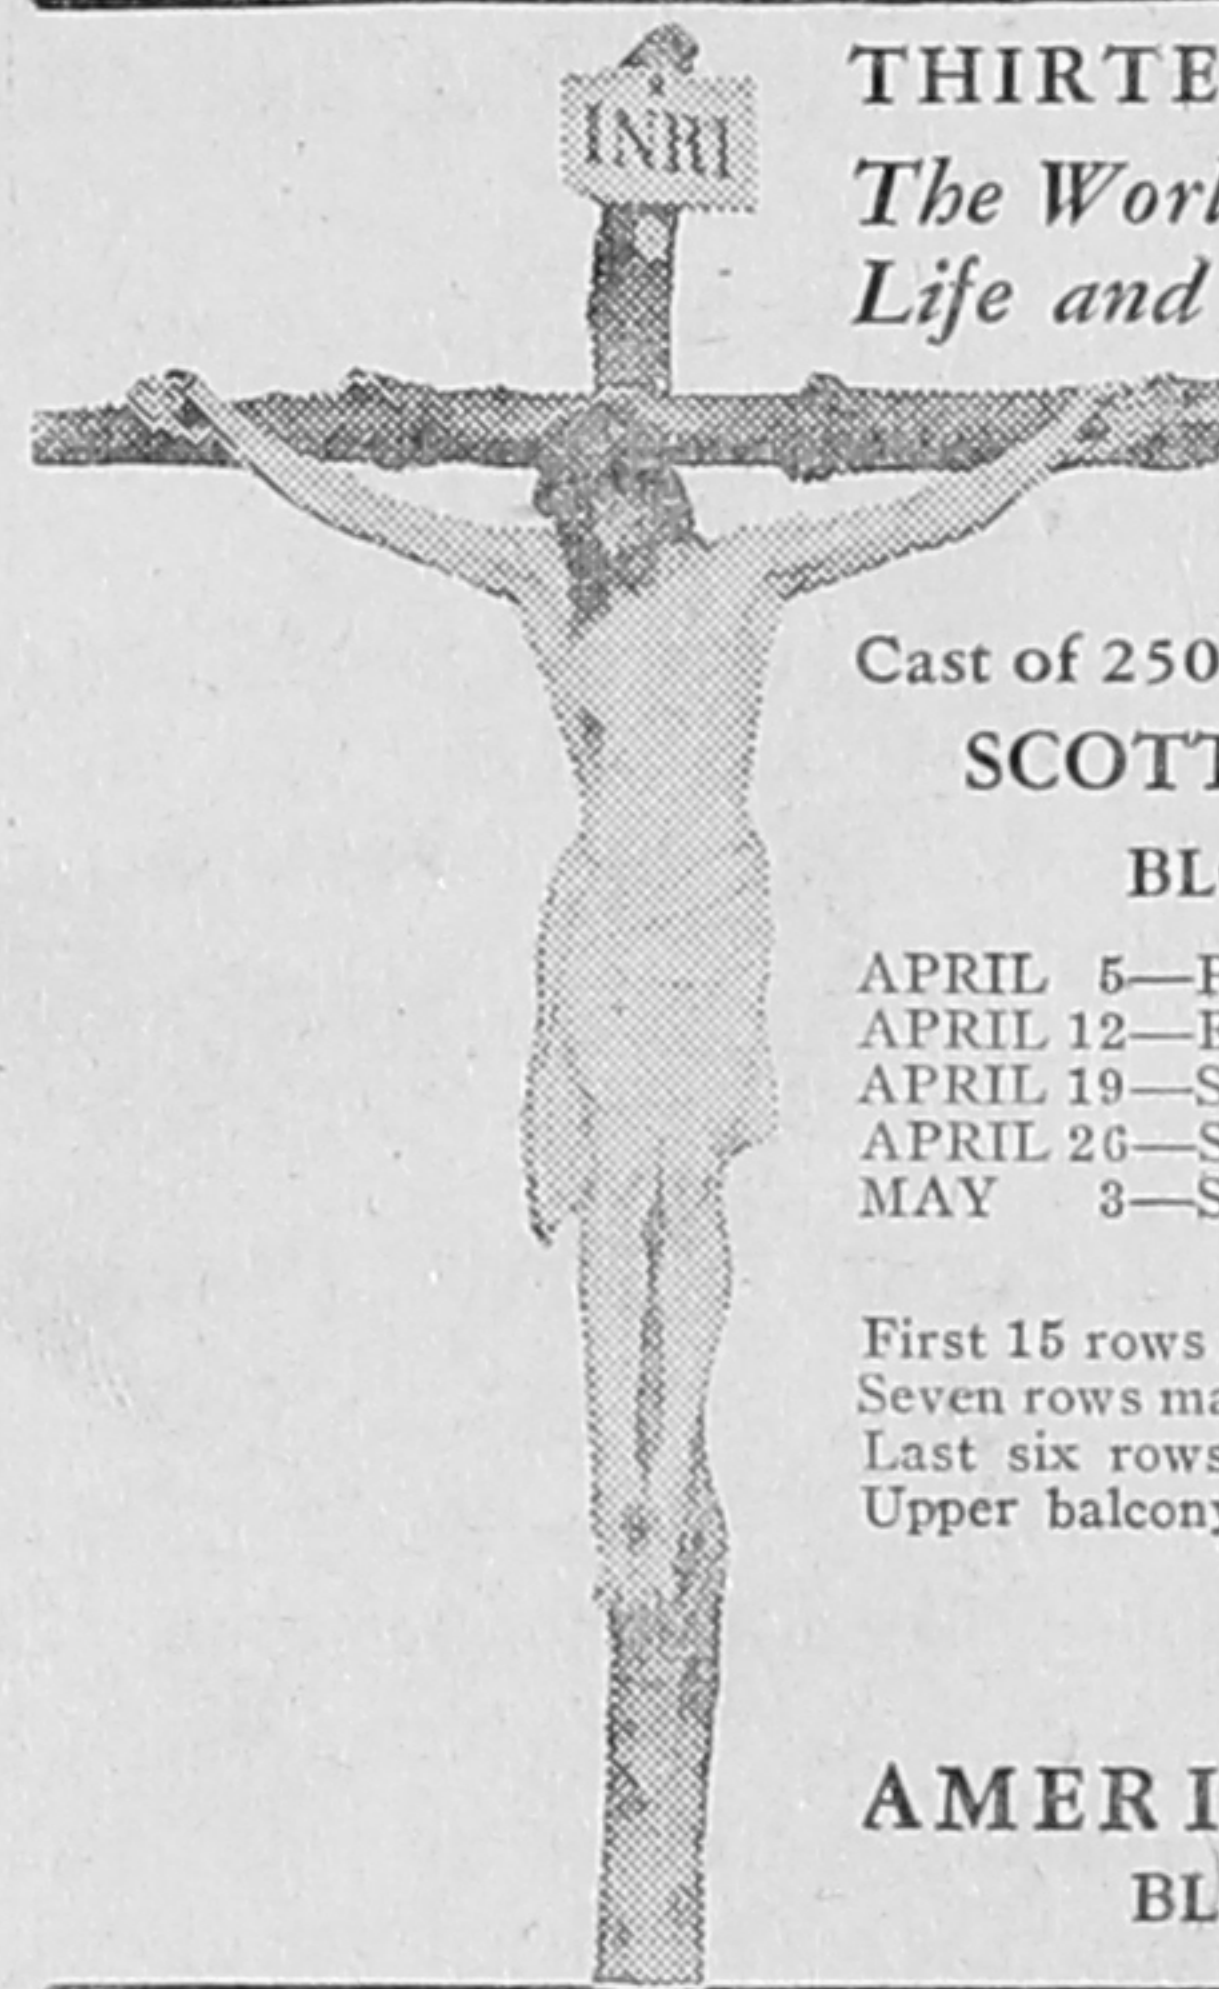

The general registration is divided as follows: Liberal Arts and Sciences, 3,802; Commerce, 1,952; Education, 619; Engineering, 1,275; Agriculture, 1,071; Fine and Applied Arts, 587; Physical Education, 318; Journalism, 171; Law, 292; Library Science, 72; Graduate School, 1,079; Summer Session (net) 1,782; Medicine, 640; Dentistry, 147; and Pharmacy, 219.

"Blood Bank" for Expectant Mothers. Chicago—A hospital "blood bank," into which expectant mothers may deposit as much as a quart of their own blood shortly before the crucial time of confinement, and which may be drawn upon for life-giving strength during childbirth, with further reductions in maternity death rates, is suggested by the University of Illinois College of Medicine.

"The principal advantage of the banked blood method obviously is one of speed in supplying immediate transfusions without the sometimes fatal delay of searching for a professional or other donor of suitable type."

ALMA MATER

This world famous statuary group, Alma Mater, stands on the University of Illinois campus where it is viewed by thousands each year. It is the work of Lorado Taft, internationally known sculptor who graduated from the University in 1879. Mr. Taft is shown in the picture. He presented this work to the University on the fiftieth anniversary of his graduation.

Develop Stronger Acid Essential Skin Disinfectant at Lower Cost to Life Found by U. of I. Chemist

A new skin disinfecting solution three hundred and fifty times as powerful in killing germs as phenol or carbolic acid and three times as powerful as tincture of iodine, yet costing only \$1.60 per gallon to manufacture in the laboratory, has been developed by the University of Illinois.

The announcement is considered important because of its economies to hospitals and clinics where surgical work requires large quantities of such solutions. The work is that of Doctors Lloyd Arnold and J. A. Valchulis of the University's Department of Bacteriology and Public Health.

"This is a simple solution," says the announcement. "It can be made up by any nurse or anyone with elementary chemical training. It keeps indefinitely. It should be used the same way as tincture of iodine, mercurochrome, and such disinfectants in common use. All unnecessary and unessential ingredients have been eliminated.

"It contains fifty per cent of ethyl alcohol and varying proportions of acetone, mercuric chloride, hydrochloric acid, chrysolidin Y, and distilled water.

"Each chemical added was done so for a definite purpose. Alcohol was put in to increase penetration and carry the mercuric chloride into the innermost skin layer, into the opening of sweat glands and down around the sheaths of the hairs. Alcohol is also itself a disinfectant, but too weak to be trustworthy. Acetone was added to remove the fat always present in the skin, hydrochloric acid to convert all of the mercuric chloride (corrosive sublimate) into its highest germ killing efficiency, coloring matter to show the 'field' or area of skin that has been disinfected. The dye chosen is of itself a good disinfectant and fades out in 24 hours. Eighty-five dyes were tried.

"We prepare this new compound for one dollar and sixty cents per gallon in our laboratory. If large quantities of ingredients are purchased, the price would be lower. Tincture of iodine (U. S. P.) costs approximately four dollars and three per cent tincture of iodine costs two dollars and sixty-five cents per gallon. The prices quoted us from various sources for tinctures of methaphen, merthiolate, and mercurochrome were over twenty dollars per gallon.

"This new compound has been used as the disinfectant in 300 cases of gunshot, automobile accidents, and other similar emergency hospital cases. It has been used in 120 cases of neck surgery and 65 cases of abdominal surgery. The reports are favorable, no infections followed, and the non-irritating properties of this disinfectant were commented upon by the surgeons using the solution."

Uni. Students Helped by Hospital Association

An increase in students benefited by the University of Illinois Hospital Association from six in the first year, 1899-1900, to 1,821 in 1934-35, and a raise in yearly benefits paid from \$48 to \$23,641.03 was shown in figures released by David M. Larrabee, assistant to the dean of men.

The Hospital Association is self-supporting. Students enjoy a voluntary membership costing \$3.00 per semester which entitles a student to 28 days' free hospitalization.

Students have their own exclusive hospital, a \$250,000 building given the University by the late U. S. Senator William B. McKinley.

The association is the oldest University group plan in operation, according to the American Hospital Association.

The statistics released by Mr. Larrabee showed that during the first eight years of its existence the association benefited 122 students or an average of 15 a year. During the last eight years, 10,796 students were benefited, a yearly average of 1,349.

X-Ray Aids in Fight Against Typhoid Carriers

Chicago, Ill.—Again man-made x-ray, guided by a scientist of the University of Illinois, is winning another battle with disease.

The University's College of Medicine reports that it has been able to use x-ray treatments over the liver and gall bladder of chronic carriers of typhoid germs and thus effect a cure.

There still exists in the state of Illinois about 1,200 cases of typhoid fever per year. Doctors know that these are infected from people who have recovered from typhoid fever and are apparently healthy, but who still pass the germs in their feces. These x-ray treatments are attacks upon the remaining reservoirs for typhoid germs in our population.

The x-ray treatments are not severe, but are light doses given once every two weeks and are repeated only five or six times.

The patients are not sick. They do not go to bed and the typhoid bacteria gradually disappear from the feces.

Members of the medical profession say that this new x-ray treatment is the only method so far devised that offers the possibility of success in the three-fold advantage of being practical, economical, and effective.

LITTLE LIGHTS ON LIVING

THREE REASONS

"HOW did you like my sermon this morning," inquired the young theologian of the little old Scotch lady walking slowly and tottering on a cane out of the little village church one Sunday morning. "I did not like it," she responded with full vigor and conviction. "I did not like it for three reasons." "What are they?" inquired the young student preacher becoming more and more interested. "Well," said the little old lady, stopping and planting her cane in front of her with a definite grip as if to punctuate her forceful sentence, "first, ye read it, second, ye didna read it weel, and third, it was, . . . it was," she began hesitatingly as if to spare his feelings, "it was na worth the readin'."

Splendidly did this young theologian respond. Claspng her hand he said, heartily, "thank you, indeed, for your help; I am the one getting a sermon this morning instead of giving one."

Years went on, the young theologian in time became one of the golden orators, and great men of the cloth of his time. Always when speaking before a group of youth, he never failed to mention the greatest friend of his youth, as he loved to call the little old Scotch lady who, by her unselfishness and sincerity, up-stepped him professionally, for as he left the church that morning, he vowed secretly to overcome each criticism the little old lady had given in her three reasons.

Our friends are truly those who care enough to tell us of our faults because they love us more, not less.

I remember talking with a lovely young woman student, who had only one bad fault as I could see, nervously biting her fingernails. "Mary," I said to her one day, "I have something to say to you that will be worth pure gold to you, but you will have to ask me for it!" She looked out of the window and then turning suddenly, she said, "please tell me, for I know you do want me to succeed." I did tell her and also suggested a remedy even at a cost to her to keep her nails beautifully manicured until she mastered this habit. In a month she came gratefully smiling to show me her progress.

"Life is only an adventure in understanding." If hearts are willing to give and receive, mutual benefit comes to each from the other.

Do You Know Illinois?
By Edward J. Hughes
Secretary of State

Q. Where is Starved Rock?
A. In La Salle County, near Ottawa, in Starved Rock State Park.

Q. Who was the first to use Starved Rock as a military post?
A. La Salle. In 1860 La Salle ordered Tony to erect a fort on Starved Rock in order to command the Miamis, Outagamis and Kipapous tribes, and serve as a refuge for the French.

Q. Who made the first map of Illinois and the Mississippi River System?
A. Joliet, on his return from his exploration with Marquette, published several maps of his discoveries.

Q. When was the Metamora Court House acquired by the State?
A. On Aug. 26, 1921. This is one of the last two remaining court houses in the State in which Lincoln practiced law.

Q. Who purchased the New Salem site in 1906?
A. William Randolph Hearst. He deeded it to the Old Salem Chautauqua and it subsequently passed into the hands of the State.

Q. When was the first life of Lincoln published?
A. Feb. 11, 1860. Written by Joseph J. Lewis, a school teacher for the Chester County Times, Westchester, Penn.

Q. When was the first dining car operated?
A. The first dining car ever operated was the Delmonico. It was built in 1868 and placed in service between Chicago and St. Louis, by the Chicago and Alton Railroad Co.

Q. What president made the last Thursday in November a national holiday?
A. The first National Thanksgiving Proclamation was made Oct. 3, 1863, by President Lincoln.
