BROADLANDS, ILLINOIS, THURSDAY, APRIL 30, 1936

NUMBER 1

Miss Monta Hayes Dies at Kankakee

Funeral services for Monta Uva Hayes, 47, who died at the State Hospital, Kankakee, on Thursday, April 23, were held at Dicks Bros. Funeral Home here Sunday afternoon at 2:00 o'clock with Rev. W. Earl Ballew, pastor of the local Methodist Church officiating. Mrs. Kenneth Dicks and Mrs. Fred Messman sang, accompanied at the organ by Mrs. Bertha Cook. Burial was in St. John's Evangelical cemetery north of Broadlands.

Miss Hayes was born in Iroquois County, March 4, 1889, and had spent most of her life in Iroquois and Vermilion Counties. She had made her home in Broadlands for a number of years and was admitted to the State Hospital at Kankakee three years ago. She had been seriously ill two weeks from complications.

Surviving is the father, William Hayes; one brother, Oscar, of Sidell; and one sister, Atlanta, who is a patient at the Kankakee hospital.

This Week's Movie Program

The following program will be given at the Broadlands Theater, this Friday and Saturday nights: Feature—Black Sheep, featuring Edmund Lowe and Claire Trevor. Plenty of humor in this one. Shorts—Football and Hurray For Rhythm. Fox Movietone News Reel. Next week's picture—Steamboat Round The Bend.

M. E. CHURCH NOTES

W. Earl Ballew, Pastor

The Sunday School meets at 10:00 o'clock. Preaching service next Sunday is at 11:00 a. m. The subject: "Christian Reformers." Anthem, "Sing Aloud Unto God." The male quartet will sing, "Have Thine Own Way, Lord."

St. John's Evangelical Church

ROBERT J. BALDAUF, PASTOR.

Sunday, May 3—
9:30 a. m.—Sunday School.
10:30 a. m.—Worship service.
2:30 p. m.—The Bloomington Federation of Evangelical Brotherhoods will meet in the Evangelical Church at Lincoln. All men of the church are urged to attend.
Tuesday, May 5—The Bloomington Federation of Evangelical Women's Union will hold its annual meeting in St. Peter's Church, Champaign, Rev. H. F. Mueller, pastor. The opening session will be held at 10:00 a. m. A covered dish luncheon will be served at noon.
Wednesday, May 6—The Royal Guard Class will meet in the evening at the home of Mr. and Mrs. Emil Schumacher. Note that the meeting was postponed one day owing to the fact that the Bloomington Women's Federation meets in Champaign on Tuesday.
Thursday, May 7—The Ladies' Aid Society will meet at the home of Mrs. Reimer Witt.
Wednesday-Friday, May 6-8—A special conference of the North Illinois District will be held in St. Paul's Evangelical Church, Elgin, Rev. Wm. Rest, pastor. The pastor and one delegate are planning to attend.

Read Eckerty's ad for Friday and Saturday Specials.

Find Shortage in Sidney Township's Funds

A shortage in the neighborhood of \$5,200 exists in the accounts of Supervisor W. L. Eaton, Sidney township, more than 200 town electors were told on Tuesday afternoon when a special investigating committee, appointed at the regular town meeting, April 7, made its report.

The report was made by S. A. Buddemeier, H. W. Winston, H. M. Rogers and C. C. McElwee, with the latter member making a supplemental report, in which more specific charges were made. In his report, McElwee made wide charges over the conduct of the supervisor's office and Wednesday morning issued a list of 43 checks which, it is charged, were illegally drawn on the bond issue account of the township.—News-Gazette.

Mrs. Mary Dicks is Hostess to G. T. Club

Mrs. Mary Dicks was hostess to the G. T. Club on Thursday afternoon of last week. The president, Mrs. Gladys McClelland had charge of the business session. New officers were elected as follows:

Pres.—Mrs. Leona Bergfield.
V. Pres.—Mrs. Edna Struck.
Sec.—Mrs. Helen Nichols.
Treas.—Mrs. Rosa Smith.

Following the business meeting the afternoon was spent in playing "500," Mrs. Edna Dicks winning the prize.

Refreshments consisted of paradise salad, cake and coffee. Mrs. Pearl Dewitt was a visitor.

Members present were Mesdames Elsa Walker, Lillie Bowman, Bertha Cook, Maude Moore, Edna Telling, Edna Dicks, Edna Struck, Anna Struck, Leona Bergfield, Rosa Smith, Jessie Bergfield, Zermah Witt, Helen Nichols, Ruth Henson, Irene Wiese, Irene Witt, Sue Harden, Jennie Nohren, Delia Nohren, Ida Messman, Maude Fitzgerald, Freda Maxwell, Mary Dicks.

The next meeting will be held at the home of Mrs. Irene Witt.

For Ailing Minds

If you want to be somebody some day—try to be somebody now.

Now and then consider how funny you may seem to people who don't know you.

Let other people live their own lives, especially when their tastes are different from yours.

Since life is full of trouble, don't act surprised when you run into some of it.

Don't be afraid to decide; but don't decide hastily just because that is less trouble than taking thought.

Learn how to make compromise with other men's convenience, so as to avoid compromise with your own convictions.

Why be afraid of the unknown so long as with a little trouble you could find out all you need to know about it.

It's a comfortable feeling to know that you can do some one thing well. And everybody could do some thing very well.

Being proud of yourself is quite another thing from being proud of your self.

Give your soul at least as much chance as you give your body—good food, clothing, air, sunlight exercise—and rest!

The May Pole

Local and Personal

P. O. Rayl transacted business in Danville, Saturday.

Thos. Bergfield is driving a new Standard Chevrolet sedan.

Mr. and Mrs. George Walker were Sidney visitors Friday.

The U. B. Ladies Aid will meet with Mrs. Jennie Nohren, Wednesday May 6.

Mr. and Mrs. Chas. King of Urbana visited the latter's mother, Mrs. Lydia Brown, Sunday.

Mrs. Lulu Swangle and children moved to Longview, Thursday.

Mrs. A. S. Maxwell, who has been ill with the flu, is improving.

Miss Mamie Darnall spent Sunday with relatives at Martinsville.

Miss Anna Clem, Mrs. Albert Smith and daughters were Champaign visitors Saturday.

Clark Henson, Maxine and Max were Champaign visitors on Saturday.

Mr. and Mrs. A. A. Cable spent the week end with relatives at Terre Haute, Ind.

A. S. Maxwell and Ed Maxwell were business visitors at Tuscola, Tuesday.

Mrs. Mary Fitzgerald spent the latter part of last week with relatives in Champaign.

Miss Wilma Messman, who has been teaching Center Point school, will teach at Liberty the coming school year.

The small daughter of Mr. and Mrs. Clyde Gore who has been seriously ill at the home of Mrs. Gore's mother near Newman is recovering.

Miss Marie Struck, who taught at Pesotum the past year will teach the first intermediate room in the Sidney Public school the coming year.

Mr. and Mrs. Thomas Waren of Hume are parents of a baby girl, Gladys Jane, who arrived at their home last Friday. Mrs. Waren was formerly Miss Naomi Harris of Broadlands.

Mr. and Mrs. Ben Bahlow, son Deane, and Ed Bahlow of Hobbs, New Mexico, F. W. Bahlow and Miss Martha Bahlow of Altamont were guests of John Bahlow and family, Wednesday.

Local and Personal

Miss Marie Witt returned Wednesday evening after a few days visit with Mr. and Mrs. G. M. Neff in Danville.

A son was born to Mr. and Mrs. Harold Smith at the Jarman Hospital at Tuscola, last Tuesday morning. This is their second child, the first being a girl.

Mr. and Mrs. John Bahlow returned home from Altamont on Tuesday, having been called there on Saturday by the death of the former's mother, Mrs. F. W. Bahlow.

The two fine rains which visited this section the first of the week greatly benefitted growing vegetation. The ground had become very dry and was badly in need of moisture.

Mrs. Nellie Astell entertained at dinner, Sunday, Harris Potter and daughter, Miss Marguerite, of Danville, Mr. and Mrs. Joe Potter and daughter, Miss Cecil, of Homer, Miss Anna Clem and Miss Clara Fagenbush.

Mr. and Mrs. Herman Struck, sons Ray and Art, Mrs. Fred Cress, son Paul, Misses Vera and Mabel Bahlow and Melvin Place attended the funeral of Mrs. F. W. Bahlow at Altamont, Monday afternoon.

Mr. and Mrs. Clark Henson and children visited the duck farm at Monticello last Sunday. They have 35,000 ducks there now. They hatch ducks twice a week and have all sizes from one day old to full grown ducks. They are all white.

Lodge Meets Next Monday

Broadlands Lodge, No. 791, A. F. & A. M. will meet next Monday night at 7:30.

John A. Bruhn, W. M. Carl B. Dicks, Sec.

Market Report

Following are the prices offered for grain on Thursday in the local market:

No. 2 hard wheat 97c
No. 4 white shelled corn 56c
No. 4 yellow shelled corn 55c
New white ear corn 55c
New yellow ear corn 54c
No. 3 white oats 21c
No. 2 yellow beans 74c

Longview High School News

Marcelle Nohren, Reporter

Miss Bisson was absent from school Wednesday due to illness.

Adelia Poggendorf visited at school Tuesday. Adelia graduated from Long View High School with the class of 1934.

Fifteen members of the Home E. Club, Miss Howard and Miss Storm attended a three course dinner at the Southern Tea Room, Tuesday night. Afterwards the girls attended a show.

The Juniors have started plans for the Junior-Senior Reception. The following committees have been appointed:

Arrangement—Betty Ruth Raymond, Gladys Tharp, Walter Schumacher, Arthur Peters.

Program—Clyde Collins, Glen Carleton, Marcelle Nohren.

Menu—Dale Churchill, Betty Jane Downie, Gladys Tharp, Sarah Wilson.

Invitations—Wayne Gaines, Betty Jane Downie, Marcelle Nohren.

The faculty and students of the Long View High School had as guests Tuesday about 20 eighth grade pupils of the school district. Classes were attended during the morning and at noon there was a large basket dinner. During the afternoon a Major Bowes program was held with Clyde Collins acting as master of ceremonies. Those taking part were Phyllis Toppe, Rachel Davis, Kathryn Warner, Melvin Todd, Lola Nonman, Dorothy Job, Marcelle Nohren, Jane Jarman, Lawrence Sy, Bob Ballard, Clarice Brewer, Irwin Neumeyer, Verla Tharp, Betty Culton, Max Seeds, Gertrude Walker, Loretta Brooks, Martha Harshbarger, Arthur Peters, Billy Zenke, Betty Ruth Raymond. Max Seeds won the contest. Later bunco, baseball, croquet and ping pong were played. Wayne Gaines and Marjorie Hedrick were the winners of the class ping pong tournament.

The Seniors have begun work on their play entitled "Crashing Society," which will be given some time in May. Following is the cast:

Adam Dunnigan, the husband, and loyal subject—Melvin Todd.

Elsie Dunnigan, the wife, ruler of the Dunnigan home—Loretta Brooks.

Marguerite, their older daughter—Rachel Davis.

George, their son—Virgil Charlton.

Christabel, their youngest daughter—Martha Harshbarger.

Scruples, their butler—Wayne Brewer.

Miss Gadgett, tutor—Gertrude Walker.

Mr. Van Witherspoon, leader in New York society—Kenneth Bickers.

Mrs. Van Witherspoon, his wife—Lois Nonman.

Cyril Van Witherspoon, their son—Charles Boyd.

Agatha Mulrooney, Virtuouse—Kathryn Warner.

Mr. John Miller, reporter—Billy Zenke.

Coming Attractions

The following pictures will be shown at the Broadlands Theater in the coming weeks in the order in which they are listed:

Black Sheep.
Steamboat Round The Bend.
Farmer Takes A Wife.
Welcome Home.
Chan In Shanghai.

Mrs. Roy Richey Celebrates Birthday

A number of relatives and friends gathered at the home of Mrs. Roy Richey last Sunday to help celebrate her 71st birthday.

A bountiful dinner was served at the noon hour. The table and birthday cake were decorated in yellow and white. A lovely bouquet of large yellow roses was a gift from Mrs. Helen Vedder of Champaign. Mrs. Richey also received several other nice gifts.

Those present to enjoy the day were Mr. and Mrs. Clyde Berry and son, Robert, Mr. and Mrs. Walter Divan, daughter, Marilyn, Champaign; Misses Mary and Ada Vedder, Urbana; Mr. and Mrs. Joe Vedder, daughters, Hazel and Jessie, Frank Vedder, Mrs. Mary Fitzgerald, Mr. and Mrs. Roy Richey.

News Items of 12 Years Ago

May 2, 1924

Cleo Seeds had the chicken-pox.

Miss Margaret Gore was given a surprise party on her birthday.

A daughter was born to Mr. and Mrs. Russell Biddle.

Wilbur Sy underwent an operation for appendicitis at Lakeview hospital, Danville.

A son, Donald Joseph, was born to Mr. and Mrs. George Edens.

Miss Frances Walsh had \$18 stolen from her purse while shopping in Danville.

Mrs. A. A. Gaines of Chicago was visiting her daughter, Mrs. Jesse Ward, and family.

Lieutenant N. E. Westfield of Chicago arrived in an airplane for a visit here with friends.

Amendments Are Necessary For Old Age Pension Law

State old age assistance officials still are awaiting word from Washington on the national social security board's action on the old age law passed at the first special session of the legislature.

It is expected that Governor Horner will make a special trip to Washington to look into the matter personally and attempt to get some response. The last word received from the federal board stated that there is a flaw in the residence requirement phase of the state law. It is possible that the legislature will be asked to amend the law before it completes the work of the second special session.

In the meantime the state old age assistance division is continuing to send out certificates to approved applicants. Nearly 500 already have been sent out and many more will be sent out in the next two weeks.

Amounts of the certificates issued so far range from \$6 to \$15 a month. These amounts, however, will be doubled when and if the federal government approves the state setup.

The national social security board has declared that the state law is bad in several ways, and a number of amendments may be necessary to straighten it out.

When The Sun Cools

For many years astronomers have speculated regarding the possibility that some day the sun will have exhausted its heat and become cold.

Dr. E. E. Trevine, president of the Mexican Astronomical Society, is one who holds this view, and points out that thousands of now extinct suns are known to have existed in the dim past. In lectures at the University of Edinburgh, Prof. A. S. Eddington also expressed the belief that the universe is slowly running down, although he admits the possibility that the heat thrown off by the sun and other stars may be gathered again in some manner to form new suns.

In any event, Old Sol appears to be good for a billion years or more, so his ultimate end has little practical interest for us. But it is fascinating to contemplate what may be the final fate of mankind when, if ever, our solar system begins to undergo a marked change, such as these astronomers predict.

The Ballot Of Death

Four ballots in an urn, three white and one black. Four men to draw them out, the three drawing white ballots to go free, the one drawing the black ballot to die. Strangely enough, the first three to draw secured the white ballots, leaving the fourth to draw the fatal black slip.

This was the dramatic scene enacted at La Paz, Bolivia, and came about in this way. Four men were convicted of the murder of former President Pando. Under the Bolivian law, only one person can be executed for a single murder, no matter how many may be implicated. So, to determine which of the four should pay the penalty, the drawing was held at the Palace of Justice.

Alfred Jauregui, 28, who had already spent 10 years in prison, was the unfortunate player in the lottery of death. He laughed when his fate was known and declared his innocence, but refused to ask for mercy. Guilty, or not, some admiration is due a man who can play such a grim game and lose with a smile.

Spending and Saving

The problem of spending and saving is as old as civilization, and in scarcely any phase of human conduct do we find greater differences among different persons. It is unfortunate that so few are able to strike a happy medium between stinginess and wastefulness.

The type of spendthrift who wastes inherited money is well known, as is also the lazy, shiftless type who lives from hand to mouth in good times or bad. The industrious worker who literally throws away his earnings is more rare.

An illustration of the latter class is seen in the late author and playwright, Edgar Wallace, who was one of the most prolific and successful writers of all time. In the 25 years before his death he wrote some 150 full length novels and literally thousands of short stories, besides 20 plays. So many of his works had big sales that his income must have been exceedingly large.

He was thought to be a very

wealthy man, but at his death his estate was found insufficient to pay his debts, and his wife was left without means of support. It seems incredible that a man of Wallace's intelligence and tireless energy should have been so short-sighted with respect to his financial affairs.

Scrambled Radio

The stenographer was about to be married and was greatly interested in cooking recipes, which she had been taking down in shorthand from a radio lecturer on home economics.

One morning she got two stations on approximately the same frequency at the same time, one broadcasting the recipes she wanted and the other giving directions for the daily exercise. Here is what she wrote in her notebook:

"Hands on hip, place one cup of flour on shoulder. Raise knees and depress clothes and wash thoroughly in one-half cup of milk. In four counts raise the lower leg and wash two hard-boiled eggs in a sieve. Repeat six times. Inhale one teaspoon of baking powder and one cup of flour—breathe naturally and exhale and sift. Jump to a squatting position and bend white of an egg backward and forward over the head and in four counts make a stiff dough that will stretch at the waist. Lie flat on the floor and roll into a marble the size of a walnut. Hop to a standstill in boiling water, but do not boil into a gallop afterward. In 10 minutes remove from fire and dry with a towel. Dress in warm flannels and serve with fish soup."

Schools and Business

Criticism has been heard from time to time because of the cooperation of groups of business men with schools and colleges in the revision of text-books.

The critics assume that the interest of business men in this matter is entirely selfish and actuated by a desire to direct the thought of students along lines in conformity with big business. The business men declare that they only seek to bring the text-books up to date.

The subject is one of great importance and one concerning which it is not safe to jump at conclusions. Certainly it is in the interest of the students, that they should have accurate information in their text-books.

The United States Bureau of Education in an official statement said:

"In the past many text-books for commercial subjects have been prepared by authors whose business experience, if any, was not sufficient to enable them to record accurately the practice in business. As a result of research 4,560 corrections were made and reported to 26 publishers of the text. The responses from the authors and publishers have proved the worthiness of business men's efforts to put commercial education on a fact basis."

Pig Feeding Tests

Some interesting facts obtained from experiments in the feeding of pigs were recently published by the Ohio Agricultural Experiment Station, which has conducted a long series of tests with soybean oilmeal in comparison with whole soybeans.

It was found that soybean oilmeal as a supplement in pig feeding saved 140 pounds of total feed for a 100-pound gain in weight, as compared with soybeans, and that both corn and supplement were saved by this method.

Soybean oilmeal gave daily gains of 1.03 pounds, while pigs fed with soybeans gained only .65 pounds. Soybean oilmeal saved more than two months' time in getting pigs to market.

Another important advantage noted was that carcasses from hogs fed soybean oilmeal were

firm and desirable, while those fed soybeans as the only supplement produced "soft pork" in a majority of cases.

Summing up the results of the tests, the experiment station recommended soybean oilmeal in pig feeding "for cheaper gains; for faster gains; for quality." Equally desirable results have been obtained in the feeding of dairy cows and poultry.

The best commercial feeds contain soybean oilmeal, and purchasers are advised to make sure that the feeds they buy contain this most economical and effective protein element.

Sidelights

June Provines, Chicago Tribune columnist, relates that at a recent funeral in suburban Oak Park one of the attending friends of the deceased was somewhat intoxicated. When the minister intoned the words "The Lord giveth, and the Lord taketh away," the inebriated one exclaimed "Fair enough."

After a disappointment in love Betty Stevens of Sussex, N. J., intimated to her mother that she would drown herself. While a gang of men grappled for her body in a nearby lake, Betty appeared to tell them that she wasn't in there, having changed her mind because the water was too cold.

At an art emporium auction the auctioneer called for bids on what he described as a bust of Robert Burns. Someone in the crowd suggested that it was not a bust of Burns, but one of Shakespeare. The auctioneer good naturedly admitted: "Maybe you're right; that shows how little I know about the Bible."

Called to view a man lying apparently dead on a San Francisco sidewalk, Coroner Leland gave him the once over and went to call an undertaker. Returning, he found his corpse gone, and bystanders said he had come to and walked away. Then the coroner and undertaker remembered that it was April 1.

A man in Kingman county, Kansas, received three neckties which he had not ordered from a blind man in St. Louis, who requested two dollars in payment or return of the goods. The Kansas man took the ties and replaced them with three old ones remarking: "The blind cuss won't know the difference."

Asked how he enjoyed a dinner given by an inexperienced hostess whose company got soured, a critical guest said: "If her cocktails had been as cold as her soup, and her soup as warm as her wine, and her wine as old as her chicken, and her chicken less tough than her guests, I would have enjoyed her dinner more."

Movie Stars See Exposition Music

John Boles and Gladys Swarthout, motion picture and radio stars, visited the Texas Centennial Exposition grounds together when they were in Dallas recently. They are shown inspecting a rare, twelfth century sacred anthem, part of the historical exhibit planned by the Exposition, first Southwest World's Fair, which opens in Dallas June 6. Mr. Boles, a native Texan, told Exposition officials that dozens of Hollywood movie stars have made plans to attend the big show during its June 6-Nov. 29 run.

One Ton of Prize Horseflesh

The first exhibit to reach the Texas Centennial Exposition lot at Dallas were the six international champion Clydesdale draft horses of Thomas E. Wilson, Chicago packer. Above, Ranagerette Frances Nalle is shown with King, largest of the six, weighing more than 2,400 pounds. The horses now are on a 10,000 mile tour of the Southwest.

Very Nice for Old Honus!

Recognize the gentleman? He is Honus Wagner, greatest shortstop in history and now coach of the Pittsburgh Pirate baseball team. The photograph was taken when Rangerettes from the Texas Centennial Exposition, \$25,000,000 World's Fair opening at Dallas June 6, visited the team's San Antonio training camp. The girls invited President Bill Benschwanger and the members of his team to attend the Exposition.

An exchange tells of a pretty nurse who subtracts 10 beats when she feels a man's pulse, making that much allowance for the effect of her personality on the patient.

The Marriage Problem

By JESSE LYNCH WILLIAMS
Author of "Why Marry?" and "The Married Life of the Frederick Carrolls."

Marriage Will Increase, Not Diminish

THERE are radicals who say, and even believe, that in the future there will be no such nonsense as marriage at all. There are conservatives who say, and try to believe, that in the future there will be no change in marriage whatever.

Both, of course, are wrong. They are merely voicing their preferences. That is all most of us use our minds for, anyhow—as mere accomplices to our prejudices and desires. So long as we have not only the mating instinct but the gregarious instinct, we shall have to have an organized society. And so long as we have an organized society we shall have to have some rules and regulations for the control of mating.

So marriage we shall always have with us. In fact, in the future, in my opinion, there will be more marrying than ever; and, instead of no marriage at all, there will probably be at least two different kinds.

I will touch on that again. But, first, before we look into the future, we must take a glance at the past in order to understand the present. There is already today a tremendous change taking place in marriage right under our very eyes, though some of us are not aware of it, because, as yet, this change has not been incorporated in the rules and regulations of the game.

In fact, there are two enormous changes which really reach the dimensions of a revolution in our ideas and in our practice of our most ancient and most important institution.

Sex has always been a bit of a puzzle to civilization, a problem which it has never satisfactorily solved, and probably never will.

We no longer regard the love of man and woman as an unfortunate weakness. Just as a plain, unromantic matter of scientific fact.

The old view of the matter is now considered not only unworthy, but as a kind of blasphemy against the Creator, who knew what he was doing when he made these arrangements for life and the continuance of it.

This higher, healthier and nobler conception of sex love has come to stay, and is now shared by nearly all enlightened people, even by the church itself.

In fact, in modern times the reactionary view of love as something purely, or impurely, physical is seldom proclaimed, except by reactionary young writers, who, strangely enough, consider themselves advanced.

The other and still more notable revolution which is taking place in modern marriage, and will be a tremendous factor in determining the new marriage forms of the future, is due to what is called birth control or voluntary parenthood.

This matter is still in a controversial stage. The moral issue involved does not concern our predictions as to the future of marriage.

In the future there will be a sufficient number of childless marriages to be regarded as the established habit of such a large class that special laws will be required for them.

Let us see what will happen. As matters are arranged today, youth is the time for love, but not for marriage. All of the forces of nature say, "Come!" All of the forces of civilization say, "But you mustn't!"

In the high tide of youth comes the natural mating time, and it is the actual mating time in all forms of life except the highest. Among professional men, for example, the average marrying age is nearer forty than twenty.

The evils and misfortunes of this state of affairs need no expansion; they suggest themselves. Besides, we see them all about us. In the future I see young people marrying at the natural age.

Now the corollary to early mating is undoubtedly a considerable amount of mismatching, and, therefore, remating. That will be unfortunate but inevitable. Easier marriage must mean easier divorce. Regrettable but true.

As for the family marriage, there will always be plenty of couples who desire children. Pessimists need never fear in regard to that.

Parenthood will be regarded as such an important privilege that it will be limited to a few, and they the fittest.

And that does not mean merely the physically fittest, but also the mentally and temperamentally most fit.

In short, we shall have an aristocracy of parenthood, and it will be the greatest aristocracy and the only sound one the world has ever known. © Public Ledger, Inc.—WNU Service.

CANNED FOODS ARE GOOD

And Scientists Strive To Make Them Better At Big National Convention

IF ANYONE has failed to realize, in this day of the universal eating of canned foods, that the canning industry of the United States works incessantly to promote and protect public health and to improve the quality of canned products, he would be convinced of that fact if he attended the Twenty-ninth Annual Convention of the National Canners Association.

When eight thousand canners and others interested in the canning industry gathered at Chicago this year they made a lot of speeches on a great variety of subjects. But of the more than forty addresses delivered, over thirty were delivered by known and accredited scientists and economists who are devoting their lives to problems of food production, health and proper nutrition. These men spoke on many aspects not only of the canning process itself but of the actual raising of the crops which are especially planted for canning—all the way from the selection of the seed and the right soil to the control of the insect pests which attack them.

The United States Government was represented in this group of scientists. Great universities sent experts. The laboratories of the can manufacturing companies contributed their quota, and there were many from the laboratories of the National Canners Association itself.

Uncle Sam Represented
The United States Government scientists who spoke included Glenn Smith of the United States Department of Agriculture and Purdue Experiment Station at Lafayette, Ind., M. W. Baker, Associate Marketing Specialist of the United States Bureau of Agricultural Economics at Columbus, Ohio, and J. E. Barr of the same government bureau. C. B. Sayre of the New York State Agricul-

tural Experiment Station at Geneva, N. Y., was also one of the speakers.

The scientists from big universities were G. M. Dack of the University of Chicago, G. W. Keitt of the College of Agriculture of the University of Wisconsin at Madison, Wis., and J. C. Walker of the same university.

Can Manufacturers Contribute
The scientists in the employ of big manufacturers of cans, who can no foods but simply supply containers, included W. M. Martin, F. W. Geise, L. G. Werner, R. Royce and B. W. Blair of the Research Division of the American Can Company at Maywood, Ill., and William H. Harrison, Director, A. E. Stevenson and G. V. Hallman of the Continental Can Company at Chicago.

Finally the scientists in the employ of the National Canners Association itself were E. F. Kohman, E. J. Cameron, C. A. Greenleaf and H. R. Smith of its research laboratories in Washington, D. C.; C. E. Lachele and J. Russell Esty of its Western Branch research laboratory in San Francisco, Calif.; and C. G. Woodbury, director of the Association's Raw Products Research Bureau.

The Public Be Pleased
Some of these scientists spoke not once but several times and the purpose of every speech was to help the canners maintain their high standards and improve their methods of canning still further so that the public may be assured not only of the absolute wholesomeness of canned foods but that it may enjoy them more and more.

In order to be sure of pleasing the public many women nutritionists and home economics experts were called upon to give their views. These included editors of women's magazines and newspapers, home economics and nutrition experts, representatives of women's clubs interested in this subject and even a woman who has been foreign trade commissioner in Oslo, Norway.

Among them were Alice Blinn of the Ladies' Home Journal, Dorothy Marsh of Good Housekeeping, Sarah Field Splint, Ada Bessie Swan and Mrs. Nell B. Nichols of Woman's Home Companion, Faye Hamilton of McCall's Magazine, Mrs. Ida Migliario of Household Searchlight, Ellen Pennington of Successful Farming, Mrs. Frances T. Northcross of the Washington Herald, Mrs. Edith Shuck of the Chicago News, Mrs. Henry Hardy, Chairman of the Cook County Federation of Women's Clubs, Virginia Porter of Libby, McNeill & Libby, Dr. Lillian B. Storms, Director of Nutrition of the Gerber Products Co., Gudrun Carlson, Assistant United States Trade Commissioner to Norway for five years, and Ruth Atwater and Marjorie H. Black of the National Canners Association.*

Air Conditioning Conference to Be Held at U. of I.

Non-Technical Discussions for Laymen Should Answer Many Questions.

Mr. Average Man can learn a lot about "air conditioning" if he attends the national conference on that subject at the University of Illinois on May 4 and 5.

The conference is sponsored by the University's College of Engineering. Home owners, business men, architects, doctors, factory owners, and engineers are expected to gather and discuss problems created by man's desire to make himself more comfortable, both in hot and cold weather.

Said to be the first such conference designed for the layman, the program will be tuned to the non-technical person.

Heading the program will be the University's president, Dr. Arthur Cutts Willard, internationally known authority on heating and ventilation. President Willard was the consultant for air-conditioning the Capitol building at Washington and he was the consultant on the ventilating system for the new famous Holland Vehicular tunnel under the Hudson River. He will define "Air-Conditioning" for the conferees at the opening session.

Comfort conditions and physiological factors involved in air-conditioning, physical factors affecting comfort, essential features of heating systems, factors affecting fuel saving, health problems and benefits created by air conditioning, mechanical problems involved, and how to make estimates of the humidification requirements of a residence, are some of the topics that will be discussed.

Also to be considered are the matters of air filters in home heating systems, commercial air conditioning equipment, estimating the cooling loads of residences, and the research work in air conditioning the University of Illinois has carried on for many years.

Mine Operators Can Profit From Uni. Experiments

Coal mine operators can save from 10 to 30 per cent of their ventilating costs if they will reconition their high velocity air shafts and other passageways and use horizontal instead of perpendicular timbering for supports, Dr. C. M. Smith of the University of Illinois Mining Engineering department believes. Some operators could save thousands of dollars annually in one mine, he said.

Dr. Smith, research specialist, bases his opinion on experiments conducted in University laboratories during the past four years on models of mine airshafts and entries, one-tenth the actual size. Results of his experiments have just been published in the Engineering Experiment Station bulletin, No. 279.

In underground mining it is commonly necessary to support some of the passageways artificially. This is usually done by installing timber supports at intervals along the passageway, many different types of supports having been used to meet local needs.

From the experiments it was found that "cross bars were the best type of timbering from the standpoint of air resistance, other comparable types developing from two to six times the resistance of cross bars," said Dr. Smith. "Since, in many cases, the use of cross bars for roof support would effect a saving in timbering as well as in ventilating costs, their use would seem to be preferred wherever feasible, to props or 3-piece sets," he said.

Here's How to Sleep Well for Good Health

As a means of securing sleep necessary for that "buoyant good health," Dr. Millicent Hathaway, University of Illinois home economist, suggests four fundamental rules to follow:

1. Establish a regular retiring hour. The body readily conditions itself to the sleep response.
2. Avoid evening excitement. Anything that will produce strong emotional reactions tends to promote sleeplessness.
3. Consciously relax at definite periods throughout the day for relief of bodily tensions. Thus you slow down the nervous mechanism and condition the muscles to periodic rest.
4. Avoid a heavy meal near bedtime. With children give them their dinner at noon if possible. Let your bedtime snack be hot milk or prepared cereals and cream, not a meat sandwich, a leg of chicken or a piece of pie.

Willard Given National Gold Medal Award

Dr. Arthur Cutts Willard, University of Illinois president, was the 1936 recipient of the F. Paul Anderson Gold Medal presented by the American Society of Heating and Ventilating Engineers.

President Willard, an international authority on heating and air conditioning, was chosen for the honor for his "outstanding work" on the Hudson river Tunnel between New York and Jersey City, N. J.; on the Capitol buildings in Washington, D. C.; on the proposed Chicago subway system, and for other research contributions.

President Willard was a pioneer in the warm air heating furnace field. His leadership in ventilating research resulted in the erection on the campus of a special test "home," by the American Society of Heating and Ventilating Engineers, in which this work could be carried on under actual conditions.

Interesting Notes

Forgetting is a normal process, according to Dr. Ira S. Wile of New York.

Pearl S. Buck, noted author, has adopted two 5-week-old baby boys.

Afternoon temperatures in the summer on Mars is between 10 and 20 degrees above zero.

Mrs. Benjamin Ellis, 70, and her 4 year old grandson, John McDonald Ewing, attend the same school in Brookings, S. D.

Mr. and Mrs. Joseph Mack of Cleveland, arrested for spooning in their own car, were awarded \$3,675 damages by the common pleas court.

It is believed a method for increasing the percentage of rubber obtainable from golden rod has been discovered at the Edison Research laboratories.

Moist air and soil are desirable for successful hunting with dogs. The moisture is needed to evaporate the scent so it will carry to the dog's nose.

The newest dictionary of medical terms contains 1,573 pages. More than 5,000 words have been added as a result of the progress of science in the last few years.

Instead of sentencing Charles Gibson, 19, of Rochester, Ind., to 2 to 14 years in the state reformatory for forgery, Judge Robert Miller ordered him to attend church every Sunday for two years.

Reuben Bement turned a flock of chickens loose in his barnyard at St. Petersburg, Ind. When the chickens failed to go to roost that night he investigated and found them all stuck fast in the mud.

Mr. and Mrs. Ora Hanley of Sidel spent Monday with Mrs. Alice Hanley, and attended the E. M. Sands funeral at Villa Grove.

Mrs. Katherine Deere entertained the L. S. L. Club, Thursday afternoon of last week, the meeting having been postponed from April 8.

A pot-luck dinner, surprising Mr. and Mrs. D. G. Haerr, was held Sunday by the Christian church members, in the Haerr home following the Bible school hour. The Haerrs will leave this week for their new home at Papineau.

A basket dinner was held Sunday in the U. B. Church basement, honoring Mrs. Ova Martinie and daughters Dorothea and Frances. Mrs. Martinie and Frances plan to leave soon for Alabama, to be gone for several weeks, and Dorothea will be married as soon as school closes.

Miss Mary Sullivan has been re-employed at Bongard school; Miss Mary Beatty at Fairview; Miss Leora Fansler and John Beatty in Longview. Miss Frances Daniels will teach in Seymour and Miss Marie Struck in Sidney. Miss Esther Hollowell who taught

in Fairland the past three years has been hired to take the place of Miss Dorothea Martinie in the Longview intermediate grades.

Allerton News

Mrs. Jessie Anderson is improving from a recent illness.

Joseph Reed, son of Mr. and Mrs. Frank Reed, has the mumps.

Mr. and Mrs. D. Dawson and mother were shopping in Danville Friday.

Miss Florence Quosick spent the week end with her mother at Bloomington.

Mr. S. Umbarger who suffered a stroke about 10 days ago remains about the same.

Frederick Davis who was injured in an automobile accident recently has not been able to return home. He is in Lakeview hospital, Danville.

The Needle club was entertained Wednesday afternoon at the home of Mrs. Paul Leird. Mrs. Roy Pollock and Mrs. Edd Harby were assistant hostesses.

2037 New Farm Bureau Members Since Jan. 1

County Farm Bureaus in Illinois signed 2037 new members during the first three months of 1936. George E. Metzger, field secretary of the Illinois Agricultural Association, reported to the IAA board of directors meeting in Chicago, April 17. This number represents 94 per cent of the new member quota set for the first quarter, Metzger said.

Not A War Report

Dead, 101,000; injured, 9,720,000. This is not a war report from Ethiopia, nor a record of fatalities in China. The figures indicate the toll taken by accidents in the United States last year, according to Secretary of Commerce Daniel E. Roper. Of the fatalities, motor vehicles

were responsible for 36,000.

The total number of Americans killed in all American wars is less than the auto deaths of the last fifteen years.
