

Can Graduate From U. of Ill. In Three Years

Illinois high school seniors who enter the University of Illinois summer quarter starting June 8, may receive their degrees in three years—June, 1945.

Another feature is that by entering in June, and attending all regular sessions offered by the University, a new student may by August, 1943, complete two full years of work—thus attaining junior standing and qualifying for several courses offered by the Navy, which lead ultimately to commissions.

The coming summer quarter at the University will begin June 8 and conclude August 29. Scholastic credit equal to that of one regular semester will be granted toward graduation.

The regular semesters of 1942-43 each will contain 15 weeks and two days of actual classroom instruction and an eight-day final examination period.

Activities of the first (Fall) semester will begin Sept. 10 with Freshman Week and freshman registration. Instruction begins Sept. 16.

The Thanksgiving recess extends from noon Nov. 25 to 1 p. m. Nov. 30, and the Christmas holiday recess from noon Dec. 19 to 8 a. m. Jan. 4. Final examinations are Jan. 15 to 23.

For the second semester, registration will be Jan. 28 and Jan. 29. Instruction begins Feb. 1 and continues without interruption to the final exam period, May 17 to 25. Commencement for 1943 is set for May 31.

Dates for the 1943 Summer Quarter are June 8 to August 28.

U. of I. R.O.T.C. Trained 4,000 Army Officers

The University of Illinois is the military as well as the academic alma mater of some 4,000 men now in the military service of the United States. Every spring for 20 years more than 200 second lieutenants have been commissioned in the army reserves from the University's Reserve Officers Training Corps.

Officer training units such as this made possible the rapid expansion of the United States Army. But the University of Illinois gave military training to many more men than those commissioned. While the commissions went to the selected men who had completed four years of military training, all men students in the University since it started have received two years of such work.

The R.O.T.C. cadet corps now numbers some 4,000 students, with 3,400 of them in the basic two years and 600 in the advanced two years. This basic training makes all Illinois men potential officer material.

The University R.O.T.C. is one of the largest in the nation. Because of its size and excellence, Gen. John J. Pershing years ago called the University of Illinois "the West Point of the West." That reputation has been upheld with jealousy.

The University cadet corps is 74 years old. It was organized in 1868 when the institution was opened. Today it is composed of six units: infantry, cavalry, engineers, signal corps, coast artillery (anti-aircraft), and field artillery (both horse-drawn and motorized).

U. of Ill. Physician Upsets Food Ideas For Healthy Livers

Theories about the best foods to keep livers healthy have been completely upset by experiments in the University of Illinois College of Medicine in Chicago.

Evidence seems to prove that it is not sugars and starches, but proteins—meat, milk, eggs—which are most necessary for a healthy liver, according to Dr. R. W. Keeton and Dr. M. A. Spellberg.

Because sugars and starches contain a form of blood sugar which is stored in the liver, they have been previously thought beneficial to it, but the University of Illinois doctors found otherwise. They also found that fats are detrimental to the liver.

They concluded that "the prevention and treatment of liver diseases in human beings may be accomplished by certain diets, especially those rich in proteins and vitamins, but low in toxic type of fat."

They added that "our research furnished further evidence that so-called 'alcoholic' cirrhosis of the liver may not be due to alcohol at all, but rather to the neglect of the diet that is so common among heavy drinkers."

Remember Pearl Harbor!

Illini Scientist Develops New Atom-Smasher

Betatron Hailed as the Most Important Invention of Decade.

Atom-smashing, super x-rays, possibly even laboratory-made cosmic rays, are within the capabilities of a machine invented at the University of Illinois by a 30-year old physicist. It opens great and entirely new fields for scientific exploration. As a super x-ray it has important possibilities in medicine, industry, and national defense.

"Betatron" is the name which has been applied to the device by its developer, Prof. Donald W. Kerst. The Betatron with which he now is working at the University produces 20-million electron volts energy. As an x-ray it is nearly 15 times as powerful as any other machine. The radiation from it is greater than from all the extracted radium in the world.

"The Betatron is the most important invention of a decade in the field of atomic physics," according to Dr. Arthur Cutts Willard, president of the University of Illinois and himself a noted engineer.

It accomplishes what scientists have long attempted to do: accelerate electrons to high speeds. Electrons are the light-weight satellite particles of atoms. It accelerates them to the highest speed ever produced in a man-made apparatus, a speed within one-tenth of one percent that of light—which is 186,000 miles a second.

The Betatron has the power to "smash" any atom in the periodic table. It opens entirely new opportunities for scientific investigation of atoms and the particles of which they are composed.

The Betatron is only 5 feet long, 3 feet high, and 2 feet wide. This is the size of the electro-magnet which is the bulk of the machine. Between the poles of the magnet is a doughnut-shaped vacuum tube in which the electrons are whirled electrically some 400,000 revolutions, and at peak speed crash into a target.

Theoretically, there is no limit to the energy which can be produced by a Betatron. Professor Kerst has prepared plans for a 100-million volt machine. The next step after that will be a 200-million volt Betatron, which may be able to produce cosmic ray effects in a laboratory.

With such a machine, as much research about these mysterious cosmic rays might be done in the laboratory in a day as is now done in a year by scientists who travel to lonely mountain tops to study the cosmic rays coming to the earth from outer space.

Premature Births, Labor, Hemorrhage, Halted by Medicine

A remedy for premature births, premature labor, and certain forms of hemorrhage which result in large mortality rates among both babies and mothers has been found at the University of Illinois College of Medicine (Chicago) in a relatively inexpensive 30-year-old medicine.

This medicine is a hormone extract from the corpora lutea of sows. It has been used for years to relieve the nausea of expectant mothers, but its life-saving power was unrecognized until discovered by Prof. F. H. Falls, head of the University's department of obstetrics and gynecology.

It costs 40 cents per ampule as compared to \$1.25 for the same amount of another premature birth remedy, or about \$25 if given throughout pregnancy as compared to \$150.

Tests in 300 cases at the Cook County hospital showed that the newly discovered remedy saved 80 per cent of the babies in threatened premature births. Tests on 200 cases in the University's Research and Educational Hospital showed similar results.

The medicine not only prevents premature births; it stops premature labor; it helps control hemorrhage from ablatio placenta, which kills unborn babies; and it delays hemorrhage from another serious complication, placenta previa, until the babies develop sufficiently to be delivered by cesarean operation.

Information on Government War Opportunities Collected

Information about 110 branches of government war service open to men has been collected at the University of Illinois and is available for students. The material covers the Army, Navy, Marine Corps, Coast Guard, Civil Service, and Federal Bureau of Investigation.

Such information has never been compiled by the federal government, and University officials feel that this service is unique. Files of the complete information are kept in the office of the dean of men and in the library, while summaries, kept constantly up to date, are in the hands of some 40 campus officials and advisory offices.

Do You Know Illinois?

By Edward J. Hughes
Secretary of State

Q. Of what officers does the executive department of the state of Illinois exist?

A. Governor, lieutenant governor, secretary of state, auditor of public accounts, treasurer, superintendent of public instruction, and attorney general.

Q. What is the tenure of office of the executive officers?

A. All, with the exception of treasurer, are elected for a term of four years. The treasurer is elected for a two-year term and cannot succeed himself.

Q. In case of resignation or death of the governor, by whom is he succeeded?

A. The lieutenant governor. In case of the latter's resignation or death the president of the senate takes over the duties of the governorship, and should he in turn be incapacitated the duties devolve upon the speaker of the house of representatives.

Q. How does the law provide for succession in the case of executive officials other than the governor?

A. The governor shall fill the office by appointment until a successor shall have been elected and qualified.

Q. When did Abraham Lincoln come to Illinois?

A. In 1830 the Lincolns arrived in Macon county and settled temporarily on the Sangamon river, about eight miles west of Decatur. In the spring of 1830 young Lincoln journeyed by flatboat to New Orleans and upon his return settled at New Salem.

Q. Is New Salem still in existence?

A. The town disappeared completely, but in 1906 the site was purchased by William Randolph Hearst. He deeded it to the Old Salem Chautauqua association and it subsequently passed into the hands of the State. The town has been restored and was dedicated as a shrine on October 26, 1933.

Q. What was Stephen A. Douglas' first public office in Illinois?

A. Public prosecutor of the first judicial circuit in 1835.

Q. When did Lincoln make his famous "A house divided" speech?

A. On June 16, 1858, before the state Republican convention. Q. What was the result of the Lincoln and Douglas debates so far as the futures of the two men were concerned?

A. Douglas was identified as the Democratic presidential hope for 1860 and Lincoln was raised to a similar position among the Republicans.

Q. Where was the national Republican convention of 1860 held?

A. The Wigwam on Lake street in Chicago.

Illinois Maternal Deaths Spectacularly Decreased By Intensive Campaign

Deaths of mothers in Illinois have been cut two-thirds in the last 20 years by an intensive material welfare campaign carried on by the Illinois State Medical society, University of Illinois, State Department of Health, and Chicago Health Department, according to Dr. Frederick H. Falls, head of the University's department of obstetrics and gynecology.

"Twenty years ago the state's maternal mortality rate was around 70 per 10,000 live births. Now it is under 30. There has been more advance in the last decade than in the entire previous history of the state," he said.

U. of I. Radio Station Is 'University of Air' For Illinois Listeners

The University of the Air! And Illinois' own. That is WILL, the non-commercial radio station of the University of Illinois. It is offering authoritative background information about the war and its problems, other informational and educational programs of many kinds, last-minute news, and good music, to listeners in most parts of Illinois and in adjacent states.

Its current schedule is the most comprehensive offering of University-level broadcasts ever offered in the nation. This includes 16 broadcasts direct from classrooms on the campus. Also on the schedule are news broadcasts eight times a day, and such musical offerings as the University's Men's Glee Club and its world-famous Concert Band.

The station operates on a frequency of 580 kilocycles with 5,000 watts power from 7 a. m. to local sunset daily, including Sunday. Free copies of the program schedule can be obtained by writing to the station at Urbana.

For talent it draws upon the University faculty, which includes experts in almost every field and subject, and upon the many talented students available at the University. While the WILL program offerings are primarily educational and informative in nature, much good music also is broadcast.

The News is \$1.50 a year.

Your News Items Wanted

Do you like to see the old home town paper full of interesting news items each week? Well, it could be, if you, and you, and everyone else would send in items that you know about each week. If you will be kind enough to help us in this matter, we certainly will appreciate it. Just drop your items in our mail box at foot of stairway. And please sign your name to it in order that we may know it is authentic. It is unnecessary to use an envelope.

A small, nonchalant negro boy is the hero of a small community near Vicksburg, Miss., today. The boy, who went to the bus-stop a few days ago with an older sister, possibly saved the lives of the 30 occupants of the bus. As the bus came to a stop and his sister started to enter, the lad pulled at her skirt and in a matter-of-fact voice told her: "You don't want to ride that bus. It's burning up." E. A. O'Brien, the driver, heard the remark and leaped from the bus to find that flames had already penetrated the body.

 Broadlands

THERE'S POWER TO WIN

● All along America's industrial front line, Electric Power is toiling with labor at the tasks of production for Victory.

● No one can accurately predict additional developments in war facilities nor do we know what demands will be made for more Electric power. We DO know that, at least up to the present, there has been a vast supply of electricity—not only for war projects but also for remaining civilian industry, commercial business and homes.

● This reservoir of available Electric power is the result of constant, careful planning for the future, sound engineering and American business methods.

● It would be false economy to try to save milk through not milking the cow and it is just as unwise to curtail the use of electricity as long as it is being thoughtfully used to promote better living—as long as its efficient use aids workers recuperation and releases valuable time for Red Cross and Civilian Defense work.

CENTRAL ILLINOIS PUBLIC SERVICE COMPANY

WAR BONDS—HAVE YOU BOUGHT YOURS?

Supervisor's Annual Report

State of Illinois, County of Champaign—ss.
Town of Ayers
Office of Town Supervisor

The following is a statement by F. A. Messman, Supervisor of the Town of Ayers, in the County and State aforesaid, of the amount of public funds received by him during the fiscal year just closed, ending on the 25th day of March, A. D. 1942, showing the amount of public funds on hand at the commencement of said fiscal year; the amount of public funds received, and from what sources received; the amount of public funds expended, and for what purposes expended, during said fiscal year ending as aforesaid.

The said F. A. Messman, being duly sworn, doth depose and say, that the following statement by him subscribed, is a correct statement of the amount of public funds on hand at the commencement of the said fiscal year above stated, the amount of public funds received, and the sources from which received, and the amount expended, and purposes for which expended, as set forth in said statement.

F. A. Messman,
Supervisor.

Funds Received and From What Sources Received

Illinois State Capitol News

Longer hours of work, greater use of modern machinery and more exchange of work between neighbors—these are the ways by which Illinois farmers are meeting the handicaps of a shortage of farm hands and the delayed field work caused by unusually wet weather last fall and early this spring. Only about two-thirds of the average supply of hired men is available this spring, and farm wages are much higher than a year ago, according to State and Federal departments of agriculture. On April 1 the average monthly wage with board for an Illinois farm hand was \$48.25. Last year it was \$37.50.

The State Department of Conservation is planning to produce about 55,000 quail this season, and 89,000 pheasants. Part of these birds will be raised on state game farms and part by sportsmen's clubs.
 The extremely wet weather of last fall definitely benefitted Illinois pheasants. Fewer birds were killed during the hunting season, and the survivors found unusually good feeding and sheltering grounds in unharvested fields of soy beans and corn. Conservation officials predict that by this fall there will be more pheasants in Illinois than ever before. The quail are also on the increase, but not to such an extent as the pheasants.

Mrs. Ronald Cable and children, Boyd and Jo Marilyn, of Chicago, came Sunday for a short visit. They visited Mrs. Cable's mother, Mrs. Minnie Boyd, who was quite ill, but is now somewhat improved.

Nickel a Week Is Family Cost Of Univ. of Ill.

Return Is Threefold: Education, Community and Professional Leaders, Research.

Operation of the University of Illinois costs the average four-person family of the state about three-fourths of a cent a day—or a nickel a week. The University's annual financial report shows that the operation cost in the last complete financial year, ending in June, 1941, was \$9,210,078.
 Income was \$9,220,021, of which \$5,432,500 came from state taxes, a yearly average of 89 cents for each of the 7,875,155 citizens in Illinois. In return, the citizens are provided not only with an educational institution of the highest ranking to which they can send their children at minimum cost, but many other things also.
 For one, graduates of the University enrich the communities of Illinois by their training—as doctors, teachers, lawyers, engineers, farmers, businessmen, homemakers, and civic leaders in many fields.
 For another, the University is the "laboratory of the people" devoting more than 13 per cent of its income directly, and more indirectly, to research problems which are of direct benefit to Illinois citizens through better farming practices, medical and dental discoveries, improved home heating, safer railroads, better highways, and hundreds of other things.
 The tax funds provided 63 per cent of the income of the University. Student fees, totaling \$1,325,905, provided 15 per cent. Federal funds, mainly for agricultural extension and research, provided \$957,667 or 11 per cent. Other income sources were private gifts and endowments, earnings, and miscellaneous.
 The University spent 52 per cent of its educational and general expenditures fund for instruction. Organized research received 13 per cent; extension, mostly agricultural, 7 per cent; libraries, 5 per cent; operation and maintenance, 16 per cent; general administration and expense, 7 per cent.
 The value of the University's plant, as of June 30, 1941, was \$36,781,884. This took into account 2,354 acres of land, including experimental fields and farms in 25 counties; 79 major buildings, 37 minor structures, 22 houses being used temporarily for tenant purposes; improvements; library; equipment; etc.
 Since the report was prepared, the University has taken over from the State Department of Public Welfare the Illinois Educational and Research Hospitals and Institutes in Chicago.

Longview FFA

Reporter, Ed Bosch, Jr.
 The F. F. A. Club will hold its May meeting on Tuesday, May 12, at 8:00 o'clock, in the chapter room at the high school.
 The officers held their meeting last week and reconsidered their plot and decided to put the plot in beans.
 In the last Ag. class this year summer record books were given out to each member for his project this summer.

STRAIGHT FROM NEW YORK

PEG-TOP PRINT
 To look smart and pretty at all times is a big contribution to morale and it can be done at below-budget prices if you choose wisely. Witness this printed jersey New York creation with newest style accent—the peg-top skirt, achieved through pleated pockets. The yoke is distinguished by fine accordion pleats.

Local and Personal Long View News

Mrs. John Bahlow and Mrs. Walter Seider were Champaign visitors Saturday.
 Henry Schumacher spent the weekend with Mr. and Mrs. Dean Upp at Vincennes, Ind.
 Mrs. Wayne Brewer of Homer was a weekend guest in the D. P. Brewer home.
 Miss Beulah Gore of Indianapolis was a weekend visitor at the Village Inn.
 Mrs. Eva Walker and Mrs. Leanna Miller visited in the Roy Hammond home at Martinsville, Thursday of last week.
 Howard Comer and Mrs. Chester Lookingbill and children visited the Bud Comers at Lafayette, Ind., Sunday.
 Mrs. Chas. Smith entertained members of the What's Trumps Club and their husbands, on Friday evening of last week. There were six tables in play.
 Mrs. Neva Crain and sons, Charles and Robert, of Chicago, spent the weekend here with relatives. Bob remained for a longer visit.
 Mr. and Mrs. Clyde Gore and daughter, Joyce, returned to their home at Flint, Mich., Wednesday after a few days visit at the Village Inn.
 Mr. and Mrs. Walter Seider entertained the following guests at dinner, Sunday: Ray Struck and family, Hans Biesterfeld and family, Melvin Place and family, and Norman Seider and family.

The Friends' Society met with Mrs. Eva Parks, Wednesday.
 Ward Martinie and family of Urbana spent Tuesday evening with Mrs. Ova Martinie.
 Mrs. E. E. Fansler was hostess to the Sidney Woman's Club on Tuesday afternoon.
 The Christian Church Bible school will present a short Mother's Day program on Sunday morning.
 Cadet Junior Churchill was home from Culver Military Academy over the weekend.
 Clarence Hood of Brocton is visiting in the A. H. Oye home. Mary Lou Oye is visiting the Hoods.
 According to the local sugar rationing board, Perry Sutton, who did not register, is quoted as saying he never uses sugar.
 Class Night was observed by the graduating class Wednesday night. Wanda Nohren was valedictorian and Ruby Coay was salutatorian.
 Mrs. Victor Gross, primary teacher, left Tuesday to visit her sister, Mrs. Stella Cole, at Decatur. Later she will join her husband at Dalton City.
 Miss Thelma Elson left Wednesday for her home at Chenoa. She will not return to teach here next year, and her loss to the community will be felt keenly. She is said to be one of the best teachers Longview grade school has had for a number of years.
