## Glenda Sue Zenke Raises 37-lb. Melon

Glenda Sue Zenke, small daughter of Mr. and Mrs. Carl Zenke certainly knows how to two-time a crop. Last June 10, her grandfather, William Zenke, purchased a watermelon and Glenda Sue took some of the seed to the garden and planted them. The summer rains started the seed to growing.

Two weeks ago she harvested a melon weighing 28 pounds; last week she harvested one weighing 37 pounds, and still has two to go—and believe it or not these melons are all off one vine.

Now that's what you call "eating your watermelon and having it too."

**THE HOME FOSTERING CHRISTIAN IDEALS**

**LESSON TEXT**—Deuteronomy 6:4-9; Luke 2:51, 52; Ephesians 5:22, 23; 6:1-4. **GOLDEN TEXT**—Be ye kind one to another, tenderhearted, forgiving one another, even as God for Christ's sake hath forgiven you.—Ephesians 4:32.

"Juvenile delinquency" is an expression often heard in our day. It speaks of the awful way in which our boys and girls have gone astray spiritually and morally in recent years. Fortunately, we are beginning to realize that most of the blame falls on the parents. It is parental delinquency in the matter of proper rearing of the children which needs our earnest attention.

The home is the right place for the fostering of Christian principles of living, but all too often even Christian people have put that whole load on the Sunday school and church. They can help, but they cannot do the job which should be done in the home.

**Home should be a place where: I. God's Word Is Accepted (Deut. 6:4-9).**

The Bible teaches us the truth about God and that is information of the highest value and usefulness in the home. He is our God, and He is one God. There is no other God, and at the same time this infinite and eternal One is very close to us—our God. How precious!

The acceptance of the truth concerning God draws forth our love toward Him. He is not like the heathen gods who cause only cringing fear. He loves us and we love Him, with all our might (v. 5).

This Word of God and the truth concerning Him should be the normal and natural subject of conversation in the home.

Any time, night or day, and anywhere, in the house or on the street, it should be as easy for a boy to talk to his father about God as to discuss his school work, or sports, or any other thing.

Let's make it a natural, normal, accepted thing that God and His Word are talked about in the home.

**II. Growth Is Expected (Luke 2:51, 52).**

In the well-ordered home the child finds his place as Jesus did, as an obedient, well-mannered, co-operative member.

There, too, is the natural place for normal, well-balanced development. There must first be growth in wisdom. The mind and will must be in control, lest the physical get out of hand. They must develop, even as the body grows. Thus the growth of the body becomes not just an animal development, but one amenable to proper restraints, cultivated and poised for full usefulness.

But the home fails if it does not at the same time give the child a chance to grow "in favor with God and man." The boy Jesus continued to grow in gracious personality, with both God and man as the interested recipients of the fruits of His spiritual development.

Every home should be a Christian home and every Christian home should be a center of normal growth for children. This should give us cultured Christian men and women for the next generation.

**III. Love Is Expressed (Eph. 5:22, 25).**

Love is not just a warm and tender feeling hidden away in the heart. It shows in the homely details of daily life in the home.

A Christian wife expresses her affection for her husband by giving him his God-appointed place as head of the house. There is a graceful and voluntary submission to God's plan for the home which makes for order and unity. Happy is the woman who seeks that place and lives in it! Her life will be blessed!

A Christian husband will learn to control that natural masculine tendency to dominate. He will study the gentle art of courtesy and kindly affection. He will love his wife as Christ loved the Church, and that means a willingness to both live and die for her.

Christianity really should show forth at its very best in the home but, alas, so often just the contrary is true! Let us get that thing straightened out and keep it right!

**IV. Rights Are Respected (Eph. 6:1-4).**

Mutual devotion between husband and wife, and mutual trust between parents and children—there we have the basis of a real God-honoring home.

We must give attention to the matter of a fair and full recognition of the rights of others. The parent who rides roughshod over the wills of his children need not profess to be a true follower of Christ. Likewise, children who are disobedient and insolent to their parents have no real testimony for Christ.

This business of being a Christian is real. It calls for right living everywhere, and that must begin at home. In the home the parent and child must both learn and live the high standards of Christ.

**Clashes in London**

Foreign ministers of the Big Five, the United States, Britain, Russia, China and France—meeting in London to try to agree on preliminary peace settlements, have clashed on so many matters that plans for the United Nations organization are gravely endangered.

The principal stumbling block, as usual, is the attitude of Russia, whose demands have become so sweeping as to threaten a deadlock among the principal Allied nations. While the London conference discussed many points the best available information indicates that agreement was not reached on anything of importance.

Having already firmly established virtual domination of most of Eastern Europe, Russia has lately expressed a determination to extend her influence to the Mediterranean area, including some of Italy's former North African colonies. This directly conflicts with Britain's vital interest in protecting her "life line" to India, Malaya, Australia and the Far East generally, which line extends from Gibraltar through the Mediterranean, the Suez Canal and the Red Sea.

Foreign Commisar Molotov has raised objections to reasonable proposals put forward by other foreign ministers concerning matters in which Russia's interests are not at stake. A case in point is his quibbling over returning to their homes of citizens of Alsace and Lorraine, who had been pressed into military service by the Germans.

Secretary of State Byrnes and the other foreign ministers are handicapped in dealing with Molotov in several respects, particularly by their lack of equal experience in international affairs. As W. P. Sims wrote this week:

"Certainly Russia went to London knowing exactly what she wanted and how she proposed to get it. It is equally certain that neither the United States nor Great Britain was as well prepared. Secretary Byrnes evidently did not have a trunkful of trick proposals for trading purposes. His mistake was to think the rest of the world as honest as himself."

However this may be, the London conference has been painfully disappointing, to say the least, and the United States and Britain apparently will soon be forced to decide whether to continue the appeasement of Russia or stand their ground.

**Sidelights**

We have always heard that a man, born in the country, works hard during his early years to get enough money to move to the city. Then he will work hard during his middle years to make enough money to move back to the country to spend the remainder of his life. "A Farm Security Administration official, knowing this trend, advises: Buy a farm and retire on it? It's a good trick—but don't try it!"

We were just reading our dozenth story on the destruction of Hiroshima by the atomic bomb and digested the fact that everything vanished into nothingness. This caused us to remember another incident when another ob-

ject vanished into nothingness and we began to wonder if the atomic bomb was really new. Remember the one-horse shay? Could it be possible that the shay was struck by an A-Bomb? They say there is nothing new under the sun—maybe atomic power has been released before.

Well, Admiral Halsey has finally taken a ride in Tokyo on a white horse. To be sure it was not Hirohito's white mount that the Admiral rode but it was a horse and the animal was white, and, too, it proves that Halsey can ride a horse, which was questioned by Admiral Spruance. Maybe the incident, as proven by photos from Tokyo, will partially satisfy all who have been anxious for Admiral Halsey to take his promised ride.

**LOOKING AHEAD**

BY GEORGE S. BENSON  
President—Harding College  
Searcy, Arkansas

**Serving Labor**

San Francisco was the first big city I ever saw. Young and interested in everything, I stopped one day to look at a big piece of plate glass being installed in a storefront. It was the lunch hour and the workmen were not busy. As they ate they drank from bottles. When the bottles were empty, they broke them. The incident gave me a distinct shock, and I never forgot it.

Back in Oklahoma, 60 miles from a railroad where I had learned to walk as well as to plow, every manufactured thing was deemed to have value. My mother literally hoarded bottles for many useful purposes. A milk bottle would have been prized in her collection. My curiosity won a battle with bashfulness and I asked the workmen why they broke the bottles, and they told me.

**Idea to Make Work.**

"You see, buddy," the foreman explained, "we work in glass. So do the working men who make the bottles. The more bottles we break the more work they will have." Later I learned that this was a tradition of the industry, supposedly based on fellowship and loyalty to Labor. At first I was very much confused—loyalty to Labor seemed entirely right to me, destructiveness entirely wrong.

Just recently, Edward T. Cheyfitz, national chairman of an important labor union, a member of the National Reconversion Committee of the C.I.O., touched on the subject in as clear and sound an economic treatise as I ever read. It appeared in the December issue of Fortune. He called bottle breaking a waste of labor and raw material, typical of an old fashioned and wrong attitude toward jobs and wages.

**For High Production.**

This big labor leader said, "I know of numerous cases in prewar days where workers deliberately held down production because they had been made to feel that this was the road to wage and employment security. We must educate union membership," he continued, "to... practice high productivity. Certainly labor can not increase its own share of goods by producing less."

To sum up the whole article, Mr. Cheyfitz contends that labor and management must find a common ground if our nation, as now constituted, is to survive. He said the survival of labor unions depends on the same thing. To find this common ground, the C.I.O. man suggests that labor and management travel the same road of maximum production. Let me add, he is right.

**A 40-Year Record.**

History backs him up. High production has always helped labor. In 1899 the average factory employee toiled 60 hours a week and earned only \$420 a year because what he produced would sell for no more than \$1,030. In 1939 the average factory worker put in only 38 hours a week, turned out \$3,140 worth of merchandise and earned \$1,150 a year. Good tools make the difference.

With better equipment, the worker produces three times as much and therefore earns three times as much. The formula is still good. Greater and more efficient production will make many jobs at good pay in the postwar years. It will require better equipment but this can be provided wherever employers and employees see eye-to-eye. Mr. Cheyfitz points to the only hope in sight for labor or capital either,

### Smile Awhile

Teacher—Sonny, you must improve your handwriting!  
 Pupil—If I did, you'd find fault with my spelling.

Has your son's college education proved of any value?  
 Yes, indeed! It cured his mother of bragging about him.

Why did you quit teaching to join the chorus?  
 Oh, there's more money in showing figures to the older boys.

Just One Generous Donation  
And You Help So Many

YES, the fighting IS over, thank God . . . but we still have a tremendous job to do. To the boys who are waiting somewhere overseas until they can come home and those of the occupation forces who still have months away from home, the USO and other entertainments are more important than ever . . . entertainments supported by your Community Fund dollars. And besides our own boys, there are millions of our "neighbors," our allies who fought beside us, who need the help that only America can give. And the dozen or more of our own local Community Chest

activities are just as important as ever.

The help that comes from the pockets and the hearts of Americans does, and will continue to do more than we realize to bind up the wounds of war and restore faith in the future.

You give only once a year to all the great causes helped by the National War Fund and your own local Community Chest. So when you give this once, for all these great causes, give your BEST.
