# THE OLD JUDGE SAYS...

STEVE: "How was the hospital dinner, Judge? Sorry I couldn't get there."

OLD JUDGE: "Very interesting, Steve. One of the doctors on the staff read a paper on the research work that is going on at one of the big universities where they are studying chronic alcoholism."

STEVE. "I'd like to have heard that, Judge." OLD JUDGE: "He pointed out that approximately 95% of the people who drink do so ensibly. Only 5% abuse the privilege oc-

casionally and included in that 5% is the very small number known as alcoholics, Then he quoted a doctor from a famous university who said 'Alcoholics are sick persons and, if treated as such, may be cured,' Alcoholism, he said, is not caused by alcohol but by deep-rooted emotional derailments which can be prevented by education and often cured through modern psychology!"

STEVE: "That's the most sensible approach to the problem I've heard."

#### Produce

The family (not the state) is the social and economic unit in the United States. In this respect our country stands almost alone. France went collectivist in the autumn election. England went collectivist last August. Russia has been collectivist since shortly after the one powerful stronghold of liberty for the individual.

peated revolutions, but that's not saying much. A convalescent can be better than an invalid but still not be envied by a well man.

England used to have free, private enterprise but the government tinkered with it until it was no long-Vive! they cried. Vive Check er free. Taxes squeezed corporation profits until the owners could not keep their plants modern. As a result, volume could not grow and wages could not rise. The unhappy workers finally gave the nation a staggering swig of Russia's political vodka and elected a state-ownership parliament.

> An Invalid Republic France, the world's habitual battle ground since Caesar, had another problem. Her small business men and farmers (many of them, at least) preferred open competition but the country's capitalists were bankrupt by years of German occupation. To get going after the war, the French submitted to government, the only power with authority, to assemble the needed capital and set up credit to do busi-

No such difficulties face the American people. Our factories are still financed, can yet keep modern. Our land has harbored no pirate army. This nation has little to fear but cheap labor; not here, of course, but abroad. Collectivism means cheap labor - wages uniimitate American products, make them poorly and sell them cheaply right in America if we permit. Forget the Tariff

This same set of facts has been presented by people plugging for a high protective tariff but that's only a crutch. The modern, 16-cylinder method for beating cheap-labor competition is to produce. Americas skilled workers using America's costly machinery can turn out any manufactured product, in better quality and at a lower cost than is possible in a cheap-labor setup. There is a collectivist theory that manufacturers will make too much profit for the good of society unless their workers slow down production. It is not true. No friend of Labor will put any obstruction in the way of maximum production because it is the road over which men must march to better wages and higher living standards. It is also this nation's escape from collectivism which brings slavery.

"OH, STOP laughing and help me get loose!" Sue wailed as she looked up into the mirthful eyes of the stranger.

"I didn't mean to make fun of you, but you do look queer stuck there in a foot of water," he said, unfastening the seat of Sue's masculine trousers from the barbed wire fence running out into the lake. He World War I. Germany and Japan helped her up and, as their hands are no longer powers. America is touched, neither spoke. "Ah ha, I thought so. Well, see it don't happen again," he warned. "The boy's been farin' pretty well, even ignorin' all the signs a feller in his right mind ought to heed. But it's all fisherman's luck."

But Ted's luck didn't change and, as the word spread that he was sending his guests home with full strings, Pop Sorensen lost a lot of business. On week-ends when Sue went out on the lake, she could see Ted and his guests in Ted's new white boats and more than once her heart stood still when she knew he was watching her across the still water. One evening he appeared at the Sorensen cabin.

"Howdy, Miss Sue," he said. "We haven't met much lately and I was wondering if you'd like to go to the dance with me Tuesday."

"Oh, Ted, you shouldn't have come. I'd love to go with you, but Dad . . ." Just then Pop Sorensen stormed into the room.

. "I'm warnin' you' to keep awa; from Susan and off my property, young feller," he roared. "Anyone who's been sayin' the things around town you have isn't welcome on Piny Point."

"See here," Ted proposed, "we can prove who's right and decide about the dance at the same time. bet I send my week-end guests home with more fish than you do, Pop Sorensen. And if I win, Susan goes to the dance with me."

Saturday was gray at first and Ted's party went into the lead as folks all around Chippewa Lake anxiously awaited the outcome. Later the sun came out. During the afternoon Pop Sorensen's luck changed and his boats began to fill with bass and sunfish.

As they compared totals after dinner Ted's party trailed by ten. "It's just what I was sayin', young feller, your beginner's luck has changed. You got to abide by the tried and true rules to come out ahead in the long run," Pop chided. Ted looked around for Sue but she was nowhere to be seen.

"And if you're huntin' fer Susan, I dont know where she went. You won't be seein' her after tomorrow's haul is counted, anyway," Pop add-

Pop Sorensen, sure his fisherman's luck had changed the day before, was dumbfounded to learn at dusk that Ted was ahead two sunfish in the two-day total. "That's a pretty slim margin," Ted observed as he stood with Sue on the Piny Point dock. "There must be something in old-fashioned fisherman's luck, after all. But we'll never leave anything to chance again, you and I," he said, taking her hands in his as she looked fondly up at him. "Say, what's this on your hands, Sue?"

"Oh, that . . . that's just some green paint that wouldn't come off." she answered. "Your white boats looked so terribly bright when the sun came out yesterday, and panting even the bottoms after dark is a U. S. Treasury Department, messy job,"
