"The Chaplain of Bataan" from getting in bad.

Col. Alfred C. Oliver, "The "Come in for a wing and a pray- rousing welcome when he adment. During his imprisonment for nothing. at Cabanatuan, the Japs ignored his Chaplain's insignia, subject times, and finally broke his neck -but not his spirit! He still wears a cup-shaped leather neck

Chaplain Oliver's description of the "menu" in Jap prison camps was enlightening, to say the least. He related how he and his comrades ate all the cats, dogs and rats that could be caught and finally were forced to eat wood pulp to stay their gnawing hunger pangs.

"It's funny now, but it wasn't ty Chaplain. "One day the Japs gave us five chickens for our socalled mess, pictures were taken for propaganda purposes. They neglected to show, however, that those five scrawny birds were to The desire of every man to be divided among 8,000 prison-

When the Chaplain and his feled and started on their trek from bling, weak and starving Americans with some protection against en's apparel of every description, including unmentionables peculiar to feminine attire. The Chaplain chuckled as he endeavored to picture the ludicrous appearance of the deliriously happy but helpless throng of bearded Americans. "We looked so queer, he explained, the boys refused to let the photographers take their pictures until suitable clothing had been obtained."

by Mary Fowler

As a help in character-building, in curbing juvenile delinquency, and in lifting the moral tone of young and old, the powerful California Federation of Women's Clubs has urged Gov. Earl Warren and the California State Legislature to write into the laws a requirement that the Bible be read daily in all schools. The women feel the issue is important enough for a special session of the Legislature if necessary.

Don't throw away those Christmas cards you received a month ago. The Save the Children Federation wants them, and is appealing to church women and church organizations to gather them. The Federation is organized to serve the underprivileged children in many parts of the United States - rural sections, city slums, trailer communities, industrial shack-towns and other places where beautiful pictures are seldom seen. People are asked to pack the cards, and mail them to Save the Children Workroom, 8 Washington Place, New York 3, N. Y.

Small Homes Get New Help From U. of I.

Planners and Owners Can Get Free Non-Technical Circulars; Institutes Aided.

For everyone planning or owning a home, new services are available from the University of Illinois. A Small Homes Council has been formed. It is issuing free non-technical circulars giving information on many home problems, helping arrange and present Home Planners' Institutes in Illinois communities, and planning other activities.

It is bringing together and applying to the small home information from many years of University research in home heating, insulation, materials, landscaping, financing, lighting, and many other subjects, and from many other sources. It is planning for the possible erection of test and specimen houses, and for other new projects and services in the small home field.

The council's first seven free circulars discuss "Storm Windows," "Selecting the Home Site," "Heating the Home," "Solar Orientation," "Financing the Home," "Selecting a Livable Neighborhood," and "Designing the Home." Others to be issued soon will discuss insulation, fuel costs, chimneys and fireplaces, interiors, painting, kitchens, and landscaping.

Single copies are free to anyone writing for them, and anyone requesting it may have his name placed on the list to receive all free circulars as they are issued. They are easy to read, present facts in language understandable by anyone, and have many sketches illustrating and adding to information in the

The circulars also are being used in the Home Planners' Institutes being presented under local sponsorship in various parts of the state with the assistance of the University's homes council.

Local businessmen, chambers of commerce, and other organizations are presenting these institutes, consisting of a dozen public meetings held weekly or at other intervals to hear experts from the University and other places discuss problems of home building, ownership, and maintenance, and to answer ques-

Topics at these meetings include design and planning of a home, the homesite, financing, business and legal problems, construction standards, methods and materials, heating and insulation, plumbing, wiring and lighting, painting and coloring, furniture and decoration, landscaping and planting, and planning of service areas such as the kitchen and laundry.

The University's Small Homes Council is providing suggested topics, lists of available speakers and literature, and other services to help these meetings bring authentic and up-to-date information to Illinois citizens before the postwar building boom begins.

Interest of the University of Illinois in homes goes back almost to the very day it opened in 1868-77 years ago-for in 1870 the University built a model farm home on its campus for the benefit and information of Illinois home builders. By coincidence, this 75-year-old house is today headquarters for the new Small Homes Council.

Check below any circulars you desire, and mail to the University:

Frozen Hopes

Saying what a man earns, expressing it in cents per hour dollars per year, does not tell much about the measure of prosperity he enjoys. Good living depends on so many things that change from time to time and differ from place to place. Prosperity depends, in very large part, on what people must pay for the things they need and

uries of life in reach of a large more." number of people helps to build a nation's prosperity. Franklin's discovery of electricity became a great discovery when electric lights began costing less than oil lamps. The where only rich people could afford to own carriage horses.

Paying for Service Plain people pay richly for favors; people. It is because they hoisted again." a wholesome standard of living in a free country. Thousands of men smaller scale and profited handsomely.

mechanical inventors to invent, the | tinued spending long hours in the thing that fires scientific explorers to explore, is the chance to earn from a free people the rich reward for a valuable service. Once upon a time in the United States of America men who had ideas could afford to develop them. They can't do it now. How I hope those days soon return.

Big Ideas on Sale

Edison, McCormick and Ford didn't need to hawk their ideas, neither did Bissell, Denton, Parker and O'Sullivan, but Foster Gunnison had to sell his. Gunnison's inventions came later. Do you ask, "Who is this Gunnison man?" Well, he is a great inventor, not yet famous. But, unless I miss my guess, he is America's post-war Henry Ford.

Gunnison invented a prefabricated house and worked out a plan to build it in mass production. His units were scientifically constructed, insulation built in, thoroughly modern in every detail. Individually, his house models are so different that a tourist might drive past 100 of them in a row and never guess that they were drawn by the same architect. Alike and Different

I could talk for hours about Gunnison houses. They come in eight sizes with great variety in looks. They are far better than any house possible to build of old-line materials in any community for the same money. They have everything from bathtub to garbage grinder, economy and convenience; a poor man's palace, amortized to \$1 a day. But the inventor sold to the U.S. Steel Corporation.—Why?

He lacked capital and, under today's tax laws, never could make much profit. The giant corporation can run the project in the red and deduct early losses from war profits, most of which the government will take anyway. Unless our war-time tax laws are changed, every fertile idea in this inventive nation will have to hatch under the wing of some huge corporation that exists already.

Dust One

By ANEL C. JOHNS McClure Newspaper Syndicate, WNU Features.

THE strawberries were shipped in early. They were flat, heartshaped. Pinkish red. The centers came out with the stem if Pattie wasn't careful.

Pattie shouldn't have bought them. But she couldn't resist. She had always brought home the first on the market since that time just after her marriage when Philip came home, smelling of gasoline. There was always hard grease on his hands and sometimes on his pugnosed face. He stopped at the table, as always, for a preview of what Spring must be here. Spring, when home folks. a young man's fancy seriously turns to thoughts of love if he's married to a gorgeous dame like one Patricia."

But that had been four years ago. And strawberries always reminded her of the days Philip went away in the mornings and came back to her in the evenings. Never too tired to dance.

Pattie loved the way they moved tle tight, saying, "You're like the Hurst. music, Baby. You make me know that, if I never have anything more, I've got everything right now. For you I clean carburetors, patch flats. Pump gas. Pour oil. There's a ritzy dame comes into the station about twice a week. She's a looker! But, Baby, you outlook her even in curlers and cold cream."

Did Philip still feel like that? That she outlooked the lookers who on his week-end leaves? The lookers who worked in canteens, doing their bit for the boys? The lookers who flirted?

land and no doubt met new people with strange ways.

Pattie was glad she had been a Mrs. Ella Maxwell. camp wife. That she had followed her Philip around, put up in a jail for two weeks in Georgia because there were no rooms available. Even slept in the back seat of the car at a filling station when she arrived in a town too late to find quar-

She was glad that she had been with him the night he was shipped. The sergeant had let her stay. She and four other wives who had little to say that they couldn't tell with the pressure of their cold fingers.

Philip had looked into her face, upturned in the moonlight, until the tears stood at her lashes and her throat hurt.

this game. Be sure to send me a cable. It'll be tough over there, waiting. I know it'll be tougher here."

It was horrible back in their house alone. She tried having the wife of one of Philip's pals live with her. But the girl was morbid. She doted on horrors, especially those of the

fretting about me. Worry is bad. I'll take care of myself. If I see a blockbuster coming at me I'll run like the deuce. I want to come home and find you just the same."

Well, she wasn't the same. She'd been in the maternity ward without Philip burned when he pulled the percolator off the stove. The neighbors helped her when she had a bad appendix that the doctor finally removed.

Philip said, "Don't ever forget every day. All day. And dream of you at night. Everything I do will assisting. Plan to come. be for you and the little one." But all of that had been so long

ago. She couldn't bring Philip back couldn't hear his voice any more. She had forgotten how he looked sitting behind the evening paper.

Suddenly her hands trembled. She formed. crushed a luscious berry between her fingers. She was frightened. If she couldn't recall here, where Philip had been, how could he remember her, where she had never been?
