

SCRIPTURE: Ecclesiastes.
DEVOTIONAL READING: Ecclesiastes 5:1-7.

Worthy Objectives

Lesson for September 28, 1947

THE Book of Ecclesiastes, written by Solomon, B. C. 977, is profitable in the fact that it discloses the findings of a very remarkable man on life. Solomon tells us that he had tried every tempting offer of the world, but found it vanity. "Vanity of vanities, all is vanity," he declares. Solomon is often referred to as the wisest of men. He does not make this claim, nor would I suggest it. As a matter of fact, Solomon was a very unwise man in many of the manifestations of his life. He had every advantage, but yielded to selfish pursuits of pleasure when he might have been serving his day and generation by the will of God.

Why do I point to Solomon as an unwise man? From his own testimony—"I gave my heart to know wisdom, and to know madness and folly; I perceived that this also is vexation of spirit. For in much wisdom is much grief; and he that increaseth knowledge increaseth sorrow."

Excellent Advice

EVEN so, Solomon was ready, by the time he wrote Ecclesiastes, to give some excellent advice. He had discovered that pomp and ceremony are meaningless—that they turn at last to ashes.

For example, "He (God) hath made everything beautiful in its time," chapter 3, verse 11. Solomon had dealt in the artificial. He had worn the most costly robes, lived in the finest palaces, had gardens set up to please any passing whim.

But now that he has come to see the vanity of men, he can at last open his eyes to the beauty which God creates. And now he has become a wise man, indeed. There is beauty everywhere if only we have eyes to see.

Words of Wisdom

THE next section of Sunday's lesson brings us to one of Solomon's greatest confessions. He says, chapter 3, verse 14: "I know that, whatsoever God doeth, it shall be forever; nothing can be put to it, nor anything taken from it; and God doeth it, that men should fear before him."

We do well to remember that God is, and that he is good, and that he is sovereign. "This is our Father's world," wrote Malthe Babcock. Here is a truth for today. In our dismay over the atomic bomb, we are about to forget that God intended for man to discover atomic energy, and he expected man to have enough moral stamina to use this discovery for his good and God's glory.

Which brings us to the heart of the Preacher's message, chapter 12, verse 13: "Let us hear the conclusion of the whole matter; fear God, and keep his commandments; for this is the whole duty of man."

Seeking the Best in Life

SOLOMON, by his own testimony, missed much of the finer things of life; but he admonishes the reader to profit by his mistake and seek the best in life. For example, in chapter 2, verse 24, Solomon says: "There is nothing better for a man, than that he should eat and drink, and that he should make his soul enjoy good in his labour."

Every boy and girl in the world knows the joy of honest work, at least I hope so. Have you grown a beautiful flower? A vegetable garden? Cut a cord of fire wood? Then you know that work is one of the essential ways of seeking the best in life.

Then Solomon comes to the first eight verses of the last chapter—a golden section for memory. It is one of the first passages of Scripture I ever learned. I trust every young person reading this column will commit that passage to memory, if you have not already done so.

Testing Life's Philosophies

SOLOMON concludes his confessions with this probing declaration: "For God shall bring every work into judgment, with every secret thing, whether it be good, or whether it be evil."

What is he saying? He is reminding us that whatever may be our philosophy of life, such philosophy, together with our commitments thereto, will be tested out under the white light of God's ultimate truth. My conclusion is that I desire but one thing—to find and follow the will of God, which is always right and always best.

The Great Telescope

If all goes well from now on, astronomers may be able to view the universe through a 200-inch telescope early next year. Work on this largest telescope ever attempted was begun 13 years ago and has had many set-backs.

The first attempt to cast the huge disk, which is practically 17 feet in diameter, was made with pure quartz, but was a failure. Using a slightly different material, the disk was successfully poured at Corning, N. Y., on December 2, 1934. After cooling for nearly two years, the 20-ton disk was shipped to Pasadena, Calif., where the long task of grinding and polishing has been going on ever since, except for the delay caused by the war.

More than five tons of glass have been ground off, and the work is now almost completed. Meanwhile the building and super-structure for the big instrument have been prepared for its reception on Mt. Palomar, about 125 miles from Pasadena, to which the great mirror must be transported with great care.

When completed, the telescope will be operated jointly by the California Institute of Technology and the Carnegie Institution, under the direction of Dr. Ira S. Bowen, who is also director of the Mt. Wilson Observatory. The Mt. Wilson 100-inch telescope is at present the world's largest.

The new telescope will be another monument to the vision and planning of the late Chicago born astronomer, Dr. George Ellery Hale, whose persistent efforts were chiefly responsible for the undertaking. He was the former director of the Yerkes and Mt. Wilson Observatories, and the editor of astronomical publications. He died in 1938 at the age of 69.

While he lived to see the work on the new telescope well under way, it is regrettable that he did not survive its completion, to witness the new wonders of the heavens which it is expected to reveal.

Ships 150 Years Old

This year marks the 150th anniversary of the launching of the two oldest American warships still afloat—the Constellation and the Constitution—the first dating from Sept. 7 and the latter from Oct. 21, 1797. These were two of six frigates authorized by Congress in an act signed by President Washington on March 27, 1794.

The Constellation was 161 feet long, of 1,278 tons, and carried 36 guns; the Constitution was 175 feet long, of 1,607 tons, with 44 guns. The Constellation cost \$314,000 and the Constitution several thousand more. Opponents of the Navy, whom we have had with us since the beginning of the nation, called this ruinous extravagance.

After the Revolution the Continental Navy was sold or scrapped, and American merchant shipping soon became the prey of Barbary pirates and later of the British.

The Constellation, Constitution and their sister ships were built to resist the plundering of the French, which led to the brief and almost forgotten naval war with France, in 1798-99. The Constellation captured the 44-gun L'Insurgente, and later put to flight the 54-gun Vengeance. After a few sea fights, the war was ended when Napoleon came to power in France and made peace with the United States.

During the war with Tripoli in 1801-05, and in the war of 1812, the Constitution (Old Ironsides) became the most famous of all American warships of the era of sailing vessels. A notable victory was the destruction of the British frigate Guerriere, in a fierce 30-minute battle off Cape Race. She also defeated the Java, the Picton, the Cyane and the Levant.

It was during her battle with the Guerriere that her crew, seeing British shots bounce off her solid oak hull gave her the name of "Old Ironsides," which was perpetuated in a poem of that name by Oliver Wendell Holmes, written when he was 21. This poem is credited with saving the noble ship from being scrapped.

The Constitution was restored and fitted with new sails during the Hoover administration, largely through public subscriptions in which the school children of the country took part. In 1931 she began a triumphal three-year tour of some 90 American ports, under her own sail, during which she was visited by about 4,600,000 persons.

Both the Constitution and the Constellation are now at the Boston Navy Yard, but the Constellation needs restoration if she is to be preserved as a naval relic. They are the last warships of the famous line of "wooden ships and iron men" which made history in the early days of the Republic.

Sidelights

In these days of high prices newlyweds are finding that the billing exceeds the cooing.

The difference between a single man and a married man is that a single man has no buttons on his shirt—and a married man has no shirt. If we are wrong—blame our informer.

We are told of an attractive little birdhouse in the backyard of a certain couple. After it was completed, a sign was placed under it: "This house for rent for a song." A few weeks later the sign was removed and another installed which read: "Wrented."

A sidewalk sign in San Francisco's Chinatown reminds us of some fellows we know who use many words to express a one-word opinion. The sign says: "Pedal legaments illuminated and lubricated for the infinitesimal remuneration of 15 cents per operation." In other words: "Shine, 15 cents."

The following definition for success has just come to our attention. "To be able to carry money without spending it. To be able to bear an injustice without retaliating. To be able to do one's duty when one is not watched. To be able to keep at the job until it is finished. To be able to make use of criticism without letting it whip you—that is success."

Using aluminum paint to reflect the sun's rays, a western railroad is "air conditioning" its cattle cars. The theory is that shipping a cow in an overheated car has the same effect as sending "the Missus" to a slenderizing salon. The silvery paint on the top and sides of the car is said to keep it five to 10 degrees cooler. That means extra weight for the cattle shipper and more dough.

They tell this story on Norman Ross; ex-long distance Olympic swimmer. Ross was taking his daily swim out in Lake Michigan and on his way back he noticed that a large crowd had gathered and was watching him from the beach. He knew from experience, what would happen when he reached the beach and he wasn't in the mood for autographs. So he had an idea. He swam to the shallow water;

stood up and asked: "What city is this?" Everybody hollered: "Chicago!" "Heavens," he said, I wanted Milwaukee," dived back into the lake and swam away.

With the world apparently in a tailspin, we can fully appreciate a recent report coming from the South Pacific. It seems that a plane was forced down in

that section during the war and only one of the crew survived. He managed to make his way to a desert island and for the past three years had used every possible means to attract passing ships, but to no avail. Just a few weeks ago, however, he was overjoyed when he was able to attract the attention of a small vessel and when he saw a boat put over the side and head to-

ward him he could hardly contain himself. Finally the boat reached the beach and from it stepped an officer with a batch of newspapers under his arm. "The captain suggests," said the officer, "that you read what's going on in the world and then let us know if you still want to be rescued."

The News is \$2 per year.

It's great to ride in BIG-CAR QUALITY
: : : particularly when you ride at **LOWEST COST!**

Even the spacious trunk compartment tells you that you can't get a body like this anywhere except on Chevrolet and higher-priced cars. It's a Unisteel Body by Fisher, with the most modern styling, genuine No Draft Ventilation, and other Comfort features.

Yes, indeed, you'll enjoy everything, including economy, when you set forth in one of these bigger-looking, better-looking Chevrolets for 1947. It offers you BIG-CAR QUALITY AT LOWEST COST—big satisfaction at big savings—in all items of purchase price, operation and upkeep.

With all its thrills for the eye—for the pulse—and for the thrifty pocketbook—Chevrolet also provides all-round security for its passengers—Fisher Unisteel construction—the Knee-Action Ride—Positive-Action Hydraulic Brakes.

Leveling a hill—threading through traffic—streaming along the straightaway... you'll get plenty of action. From the Valve-in-Head Thrift-Master Engine, with the longest, strongest record of performance of any automotive engine built today.

Settle back, settle down—and you'll settle for a new Chevrolet! For your own thoughts will tell you there's no other car in its field that rides so smoothly, so steadily, so safely. That's because of Unitized Knee-Action—exclusive to Chevrolet and higher-priced cars.

Be sure your car is ready for winter! During September and October Chevrolet dealers are making a special point of fall service to demonstrate the excellence of our service facilities and quality workmanship. So bring your car in soon and let us get it ready for the bad weather days ahead.

ADEQUATE WIRING TODAY—BETTER LIVING TOMORROW

PLUG IT IN WHERE?

IT CAN BE WHERE YOU WANT IT!

Adequate wiring is your only safeguard for quicker action and greater convenience. When you get those many electrical appliances you really want and need, be sure you have plenty of electrical outlets so you can place these added "helpers" where you want them.

More and more modern homes rely on electricity for lighting... meal preparation... food storage... housekeeping... entertainment... for time saving.

The future will bring many more electrical uses. Plan now for good things to come with Adequate Wiring... and you won't be saying... "I wish we had."

Smile Awhile

Sonny, said his mother, helping him with his home work, how much are 7 and 4?
Twelve, answered Sonny.
Not bad for a little shaver, volunteered his father, an ex-top kick, he only missed it by 2.

No matter how many peace treaties we sign, observes Virgil F. Whiffletree, World War II won't be over until a nickel will buy something more than just a wrong number on the telephone.

The fifth grade teacher was talking about the law of gravity. Sir Isaac Newton, she explained, was looking at an apple tree and an apple fell to the ground. And from that he discovered gravitation. Wasn't that marvelous?

Yes, answered a boy in the last row scornfully, but if he had been settin' lookin' at books, he wouldn't have discovered nothin'.

It was a typical gossip fest that brought on a discussion of diets, figures and postwar girdles bursting at the seams.

If you think I'm getting fat, snapped one of the ladies, what about yourself since they took off sugar rationing? Now I know what they mean when they talk about losing the Battle of the Bulge!

Two glamour girls boarded a crowded streetcar, and one of them whispered to the other: "Watch me embarrass a seat from a male passenger."

Pushing her way through the straphangers she turned all of her charms upon a gentleman who looked substantial and embarrassing. My dear Mr. Brown, she gushed loudly, "fancy meeting you on the streetcar. Am I glad to see you. Why you're almost a stranger. My, but I'm tired."

The sedate gentleman looked up at the girl, whom he had never before seen, and as he rose, said pleasantly, "Sit down, Bertha, my girl. It isn't often that I see you out on washday. No wonder you're tired. By the way, don't deliver the washing till Wednesday. My wife is going to the district attorney's office to see whether she can get your husband out of jail!"

Can You answer these questions... about our Champaign County Community Chest?

Q...Why do we have a Community Chest?

A...Because it's the simple, sensible way to raise the money needed by all the Red Feather social, welfare, health and recreational services that serve in our community.

Q...What are these Red Feather Services?

A...You'll find them listed at the bottom of this message.

Q...How much money do we need?

A...\$89,118.

Q...Who decides the Campaign goal?

A...A committee of our own local citizens has studied the needs of the community and the budgets of each agency. Incidentally, the high cost of living has affected every community service, too. Costs of food, clothing, medicine, building, upkeep—they're 'way up for Red Feather services just as they are for you.

Q...Who decides how much each Red Feather Service gets?

A...Our committee weighs the importance

of each service to this community.... and allocates the funds accordingly.

Q...What advantage is there in giving to the Chest, rather than directly to an agency?

A...Because each of these Red Feather Services won't be separately ringing your doorbell asking for funds. But more important, the good of the whole community rather than the persuasive power of competing agencies will determine how the money is divided.

Q...How does "everybody benefit" from the Community Chest?

A...It is estimated two out of every five families in town use one or more Red Feather Services during a given year. They are the direct beneficiaries. Actually, of course, every one of us benefits when we live in a town where community spirit and conscience really protect the young people, strengthen family life, provide health and medical services, care for the helpless, handi-

capped and aged. Wouldn't you say so?

Q...How much should I give?

A...That's strictly up to you. You might find the answer by asking yourself how much you'd give each Red Feather Service if they came to you separately. Add the answers and try to match the total. Remember, too, you won't be asked again for an entire year.

Q...How do I give?

A...During the campaign, a volunteer Red Feather worker will call on you at home or at your place of business.

Q...Do I have to pay my pledge all at once?

A...No, indeed. You may pay at several periods during the year when it is most convenient. Your word is as good as your bond!

Ice Box Watermelon
Latest development in the watermelon field is the new de luxe model designed to fit into a family-size refrigerator. These new varieties have greater advantage than their small size. They are rounder, have thinner rinds, a deeper red color, less stringy fibre, and are sweeter than their old-fashioned cousins.

Raise Sesame for Oil
In India and China sesame has been used as a food since 450 B. C. The Western hemisphere, however, has been somewhat slow in recognizing the value of this seed crop, which has a high protein content and contains a good-grade edible oil in quantity up to 50 per cent of its weight.

From where I sit... by Joe Marsh

We All Need Fun!

Nobody in Our Town is exactly lazy (even though Pete Swanson's missus claims he sleeps till seven A.M.). But the hard-st working man of all is Doc Itolister—on call, morning, noon and night.

Funny thing, Doc's favorite prescription to his patients is: You ought to have fun. The pace of modern living, even on the farm, demands some relaxation.

And as Doc says—fun is a personal thing. For the missus it may mean a movie or a good book; for Dad, a mellow and refreshing glass of beer; and for the kids, parcheesi or the radio. Doesn't mean everybody has to like the same thing—so long as they relax, have fun, together, in the home.

Doc doesn't have much time himself. After a hard day, he'll relax before the fire with a glass of beer—and wait for the phone to ring again. And from where I sit, Doc deserves each well-earned minute of that relaxation.

Joe Marsh

They Are Everywhere
Bacteria are found almost everywhere, in air, water, soil, food and the body. It has been estimated that there are ten million tons of bacteria in the ocean. In sea water phosphorescence is caused by bacteria.

Overhead Wire Power
In 1822 a Doctor Finney, Pittsburgh, devised an overhead wire method of running transit vehicles. This same principle, that was later used to power the street car and trackless trolley, was considered impractical at the time.
