### Smile Awhile

What brand of cigarettes do er coming up. Bill said: you smoke, Scotty? ite to ask.

I don't believe you know the his hat and murmured: meaning of the word 'courtship,' said the designing young woman. Don't I? replied the wary you-

ning after a woman until she roast to a customer, a woman catches you!

how much it cost you? and said: I hope you won't mind Second Shopper—One hundred my being served ahead of you. and twenty-five dollars. Twen- Oh, no, shrugged the first woty-five dollars for the hat and man, not if you're as hungry as one hundred dollars for the suit as all that.

A woman returned a smart pair of shoes to the exclusive shop where she had purchased them. They won't do, she announced.

I simply can't walk in them. Madam, the clerk replied, looking down his nose, people who have to walk don't shop here.

Bill Jones called in a plumber to fix an upstairs faucet and as he and his wife were coming downstairs they met the plumb-

Before I go downstairs I would I would na know. I'm too po- like to acquaint you with the cause of the trouble.

The plumber politely removed

Pleased to meet you ma'am.

Just as a small-town butcher ng man. Courtship means run- was explaining the merits of a rushed in and interrupted him.

Give me half a pound of cat First Shopper-That's a smart meat-quick! she ordered. Then hat you're wearing. May I ask she turned to the first customer

### RUHM'S PHOSPHATE

How Fine Is "85% Thru 300 Mesh?"

This is a term used to describe the fineness of a phosphate rock ground down to a point where 85% will wash through a copper screen woven so fine there are 300 openings to the inch, 90,000 openings to the square inch. This is so fine that the unaided eye is hardly able to distinguish the weave. This is so fine that to pass through this screen there must be approximately 27,000,000 particles of phosphate rock in one cubic inch of Ruhm's Phosphate Rock. This is finer than flour, finer than cement, finer by far than any other phosphate rock sold on a commercial basis.

Will's Hospitality

Isn't "Cracked"!

Ever since January, Will Dudley planned to give his living room that "new look"-planned to carefully refinish the woodwork and replaster the walls.

Every time Will got out the putty to start filling in the cracks, a neighbor stopped by to pass the time of day - and first thing you knew, there was a group of us helping Will do the job up right. After Will called a halt to the evening's work, we'd sit around the fire enjoying a friendly argument and a sparkling glass of mellow beer.

So Will's living room doesn't look like it did a year ago-but it's by far the most "livable" living room I know: A place you can always drop in for good talk, good beer, and a warm welcome.

From where I sit, so long as Will puts that atmosphere of hospitality and good fellowship ahead of everything else, we'll all be happy to help Will change the looks of his living room any time he wants.

> Higher Oil Costs Known reserves of record proportions assure a continuing supply of petroleum fuels and lubricants, yet higher prices must be expect-

> ed, the SAE annual meeting was informed. Even with current domestic consumption exceeding five million barrels daily, reserves are larger than at any other time, but the greater effort required to recover crude oil and to convert natural gas and coal into liquid products necessitate higher prices.

Turban Has Its Uses To Western eyes the turban appears to be a complicated headgear, more picturesque than useful. But that is not the case. In the bitter winter of the Asiatic plains it is wrapped around the head loosely and the ends tied around the neck to provide both a warm cap and muffler. In the dry, sunny summer it is wound to provide a shading peak over the eyes and the loose ends are used to protect the nose and mouth from swirling dust, World
