Longview Chapter FHA Installation Ceremony

On Wednesday night, Oct. 13, at 7:30 p. m. an FHA formal installation service was held for the new officers for the year 1948-1949. About fifty people, mostly mothers of FHA members, were present for the occasion.

Mary Rose Donley, president for the past two years, presided over the service and heard the officers-elect tell their duties and responsibilities and repeat a pledge of service to the organization.

Candles, representing the eight purposes of the organization, were lighted by the retiring officers and furnished the only light during the ceremony. Mrs. John Agnew played instrumental music during the entire ceremony.

The retiring officers were Mary Rose Donley, president; Frances Smith, vice-president; Marion Dohme, secretary-treasurer; Betty Gerike, reporter. Hope Celestine Zenke, Betty Jo Dyar and Betty Richardson acted as retiring officers in the absence of Marion Dohme and Betty Gerike.

The officers installed at this ceremony were Patricia Warnes, president; Geraldine Dewitt, vice president; Frances Smith, secretary; Doris Davis, treasurer; Ruth Partenheimer, parliamentarian; Barbara Hedrick, historian; Mary Rose Donley, reporter; Frances Dohme, song leader.

After the retiring officers relinquished their positions, a short business meeting was held and refreshments were served. Corsages of red roses were presented to Mrs. Edith Reiley, new advisor for the club, and Mrs. Delbert Warnes who has been Chapter Mother for the past two years and will serve again this year.

Corn Crop to Set Record For County

With the harvest already under way, the 1948 corn crop is expected to establish a new all-time record, surpassing the bumper yields of 1946.

Reports indicate that while isolated fields, due to overflowing during the growing season, and in some instances, a lack of fertility, will fall somewhat below 70 bushels, a countywide average can easily reach 70 bushels, or 6 bushels more than indicated in the midseason forecasts.

Soybeans, on the basis of the fields harvested during the present month, will yield approximately 24 bushels to the acre, a figure two bushels under the production record of 1946.

The state outlook for a record high yield and production of corn, anticipated a month ago, has been maintained, according to official reports. The estimated yield stands at 59 bushels per acre, two bushels above the previous record and 20 bushels above last year's crop. Production of 534 million bushels is over half again as large as the 1947 crop and 28 million bushels larger than the former record crop of 1946.

Card of Thanks

I want to thank everyone for their help in any way, also for cards, letters, flowers, candy, and their visits, while I was in the hospital. All was very much appreciated.

U. S. Must Keep Ahead

It is reassuring to note that the U. S. Atomic Energy Commission is not impressed with the latest phony proposal of Soviet Russia for an international agreement on atomic weapons. This was expressed by David E. Lillienthal, commission chairman, in an address before the Executives' Club of Chicago a few days ago.

He said that while the Baruch plan, proposed by the United States, was "rascal-proof," the Soviet proposal was merely a "paper agreement" of no value.

In the absence of effective international controls, Mr. Lillienthal declared that the commission will work to keep American superiority unchallenged in all aspects of atomic energy. He said the commission's projects were using "scores of tons" of uranium, and that a world search is being made for uranium ore and other raw materials used in the production of atomic energy.

He also revealed that plutonium, a man-made element used in improved atom bombs, is being produced on a "factory-size" scale in the United States. He added:

"There is no substitute for effective international controls. Until we have them, the only course is the one we are pursuing."

We can agree that this is so, but another question that arises is whether any international agreement could be devised that Russia could be prevented from violating if it suited her purpose. As has been so often stated, we

simply cannot do business with Stalin except on his own terms. And if we appease him today, he will make a new demand tomorrow.

Civil War Veterans

The 58th annual national reunion of the United Confederate Veterans was recently held in Montgomery, Ala., with only three of the 56 surviving members present. They were James W. Moore, 97, Selma, Ala.; W. W. Alexander, 102, Rock Hill, S. S.; and R. V. Coolie, 104, of Lewisburg, N. C.

The meeting was held in the historic old Exchange hotel, in which Jefferson Davis was chosen as president of the Confederacy in 1861.

Meeting with the veterans were the Sons of Confederate Veterans, the Order of Stars and Bars and the Confederate Memorial Association.

An invitation was received from the remaining members of the Grand Army of the Republic to hold next year's reunion jointly with them. Only 28 Union veterans are still living, and but six were able to attend their recent reunion in Grand Rapids, Mich.

Sentiment favorable to acceptance of the invitation for a joint reunion was voiced, but the ages of the survivors on both sides makes it doubtful that it can be arranged. Such a reunion, if possible to be held, would be a fine gesture in token of our united country.

Sidelights

Worry, someone said, is like a rocking chair—it will give you something to do but it won't get you anywhere.

Truly there are two periods in a man's life when he doesn't understand women—before marriage and after marriage.

Why is it that when a man knows all the details of a certain news story, the account of it is

the first item he will read? Just wants to see if the editor prints it right, we presume.

If those who love to argue would realize that the more arguments they win the fewer friends will be left with which to argue, there would be fewer arguments.

A certain father had the rare privilege (?) of escorting his four year-old son on a train trip. The mother was on a visit to her parents and took only the baby with her. Immediately after reaching his destination he sat down and wrote the railroad company and asked: "What is the official record for paper cups used by a small boy of the restless type on a 200-mile train ride?" Should there have been a contest, no doubt he had an entrant in mind.

One answer to the age-old question: "Why does the hen cross the road?" can be given by E. A. Laufer, of Denmark, Iowa, who claims that a neighbor of his has been getting an egg delivered regularly in his bedroom from a hen whose owner lives across the road. The hen, which apparently was looking for a comfortable place to deposit the egg, selected the neighbor's bed each morning and continued this act until she started setting—and then came back to renew the act when she resumed laying.

GOVERNOR GREEN'S ACCOMPLISHMENTS

Citizens of Illinois are manifestly proud of what Governor Dwight H. Green's administration has done for Farmers, Workers, Businessmen, for Veterans, the Aged, Dependent Children, the Blind and in other constructive programs that affect the entire population. Every citizen in every County has benefited. Below are specific benefits of Governor Green's administration

SCHOOLS—Champaign county's share of the state school fund was \$298,219.53 for 1947-48. Under Governor Green each session of the Legislature has increased common school grants. The present appropriation is 155% greater than 1939-41, the last under the Democratic administration.

Under the present administration the University of Illinois received appropriations of \$84,594,118 for the present biennium. (The U. of I. received \$17,131,536 for the biennium of the last Democratic administration.)

VETERANS' BONUS—The first 4,430 veterans in Champaign county to get their bonus received \$1,781,173.96. When completed some 8,340 Champaign county veterans will receive approximately \$3,353,267.66.

PUBLIC AID—\$5,484,471.34 expended for General Relief, Old Age, Blind, and Mothers' Pensions and Aid to Dependent Children since 1940. State contributions, including federal assistance, totaled \$4,794,171.88. Only 12.6% was obtained by local tax levies for general relief in Champaign county.

HIGHWAYS—\$1,842,065.95 highway construction awards have been let for Champaign county since 1940 . . . \$1,115,261.02 expended for highway maintenance . . . \$1,934,181.16 Motor Fuel Tax . . . \$457,517.35 for township roads (the first ever appropriated by any administration) in the 1945-47 biennium. Another similar appropriation is now being allocated . . . a grand total of \$5,349,025.48 for Champaign county roads.

WELFARE—Expended \$188,939 for care of 273 Champaign county patients in Welfare Institutions during 1947 and a total of \$956,479 during Governor Green's administration.

AIRPORT DEVELOPMENT—Granted \$163,000, gave engineering assistance and technical aid in development of University of Illinois Airport at Champaign.

AGRICULTURE PREMIUMS—Since 1940, the Champaign county fair has received \$71,730.97 in state premium funds and \$9,312.00 for 4-H Club premiums.

POST-WAR PLANNING—Post-War Planning Commission has allotted \$21,162 to Champaign county, its cities and school districts for plan preparations of public works projects, which will cost \$1,493,170 when completed.

STATE PARKS—Kickapoo State Park water system completed and electrical system added . . . Built larger shelter house, comfort station, concession stand, surfaced roads, constructed parking area and established Boy Scout camping area.

CONSERVATION—Approximately 72,975 trees planted and 65,189 fish distributed in various lakes and streams of this county, costing approximately \$4,000.

* Senator Everett R. Peters and Rep. Ora D. Dillavou and Rep. Charles W. Clabaugh have outstanding records under Governor Green's administration and have played an important part in the accomplishments listed here for Champaign county.

From where I sit... by Joe Marsh

I'm Glad We're "Different!"

There's a lot of difference of opinion in our county on the best kind of pasture. Some say alfalfa mixed with brome grass—others say mixed with oats or barley. But all agree that a mixture's better than a single crop.

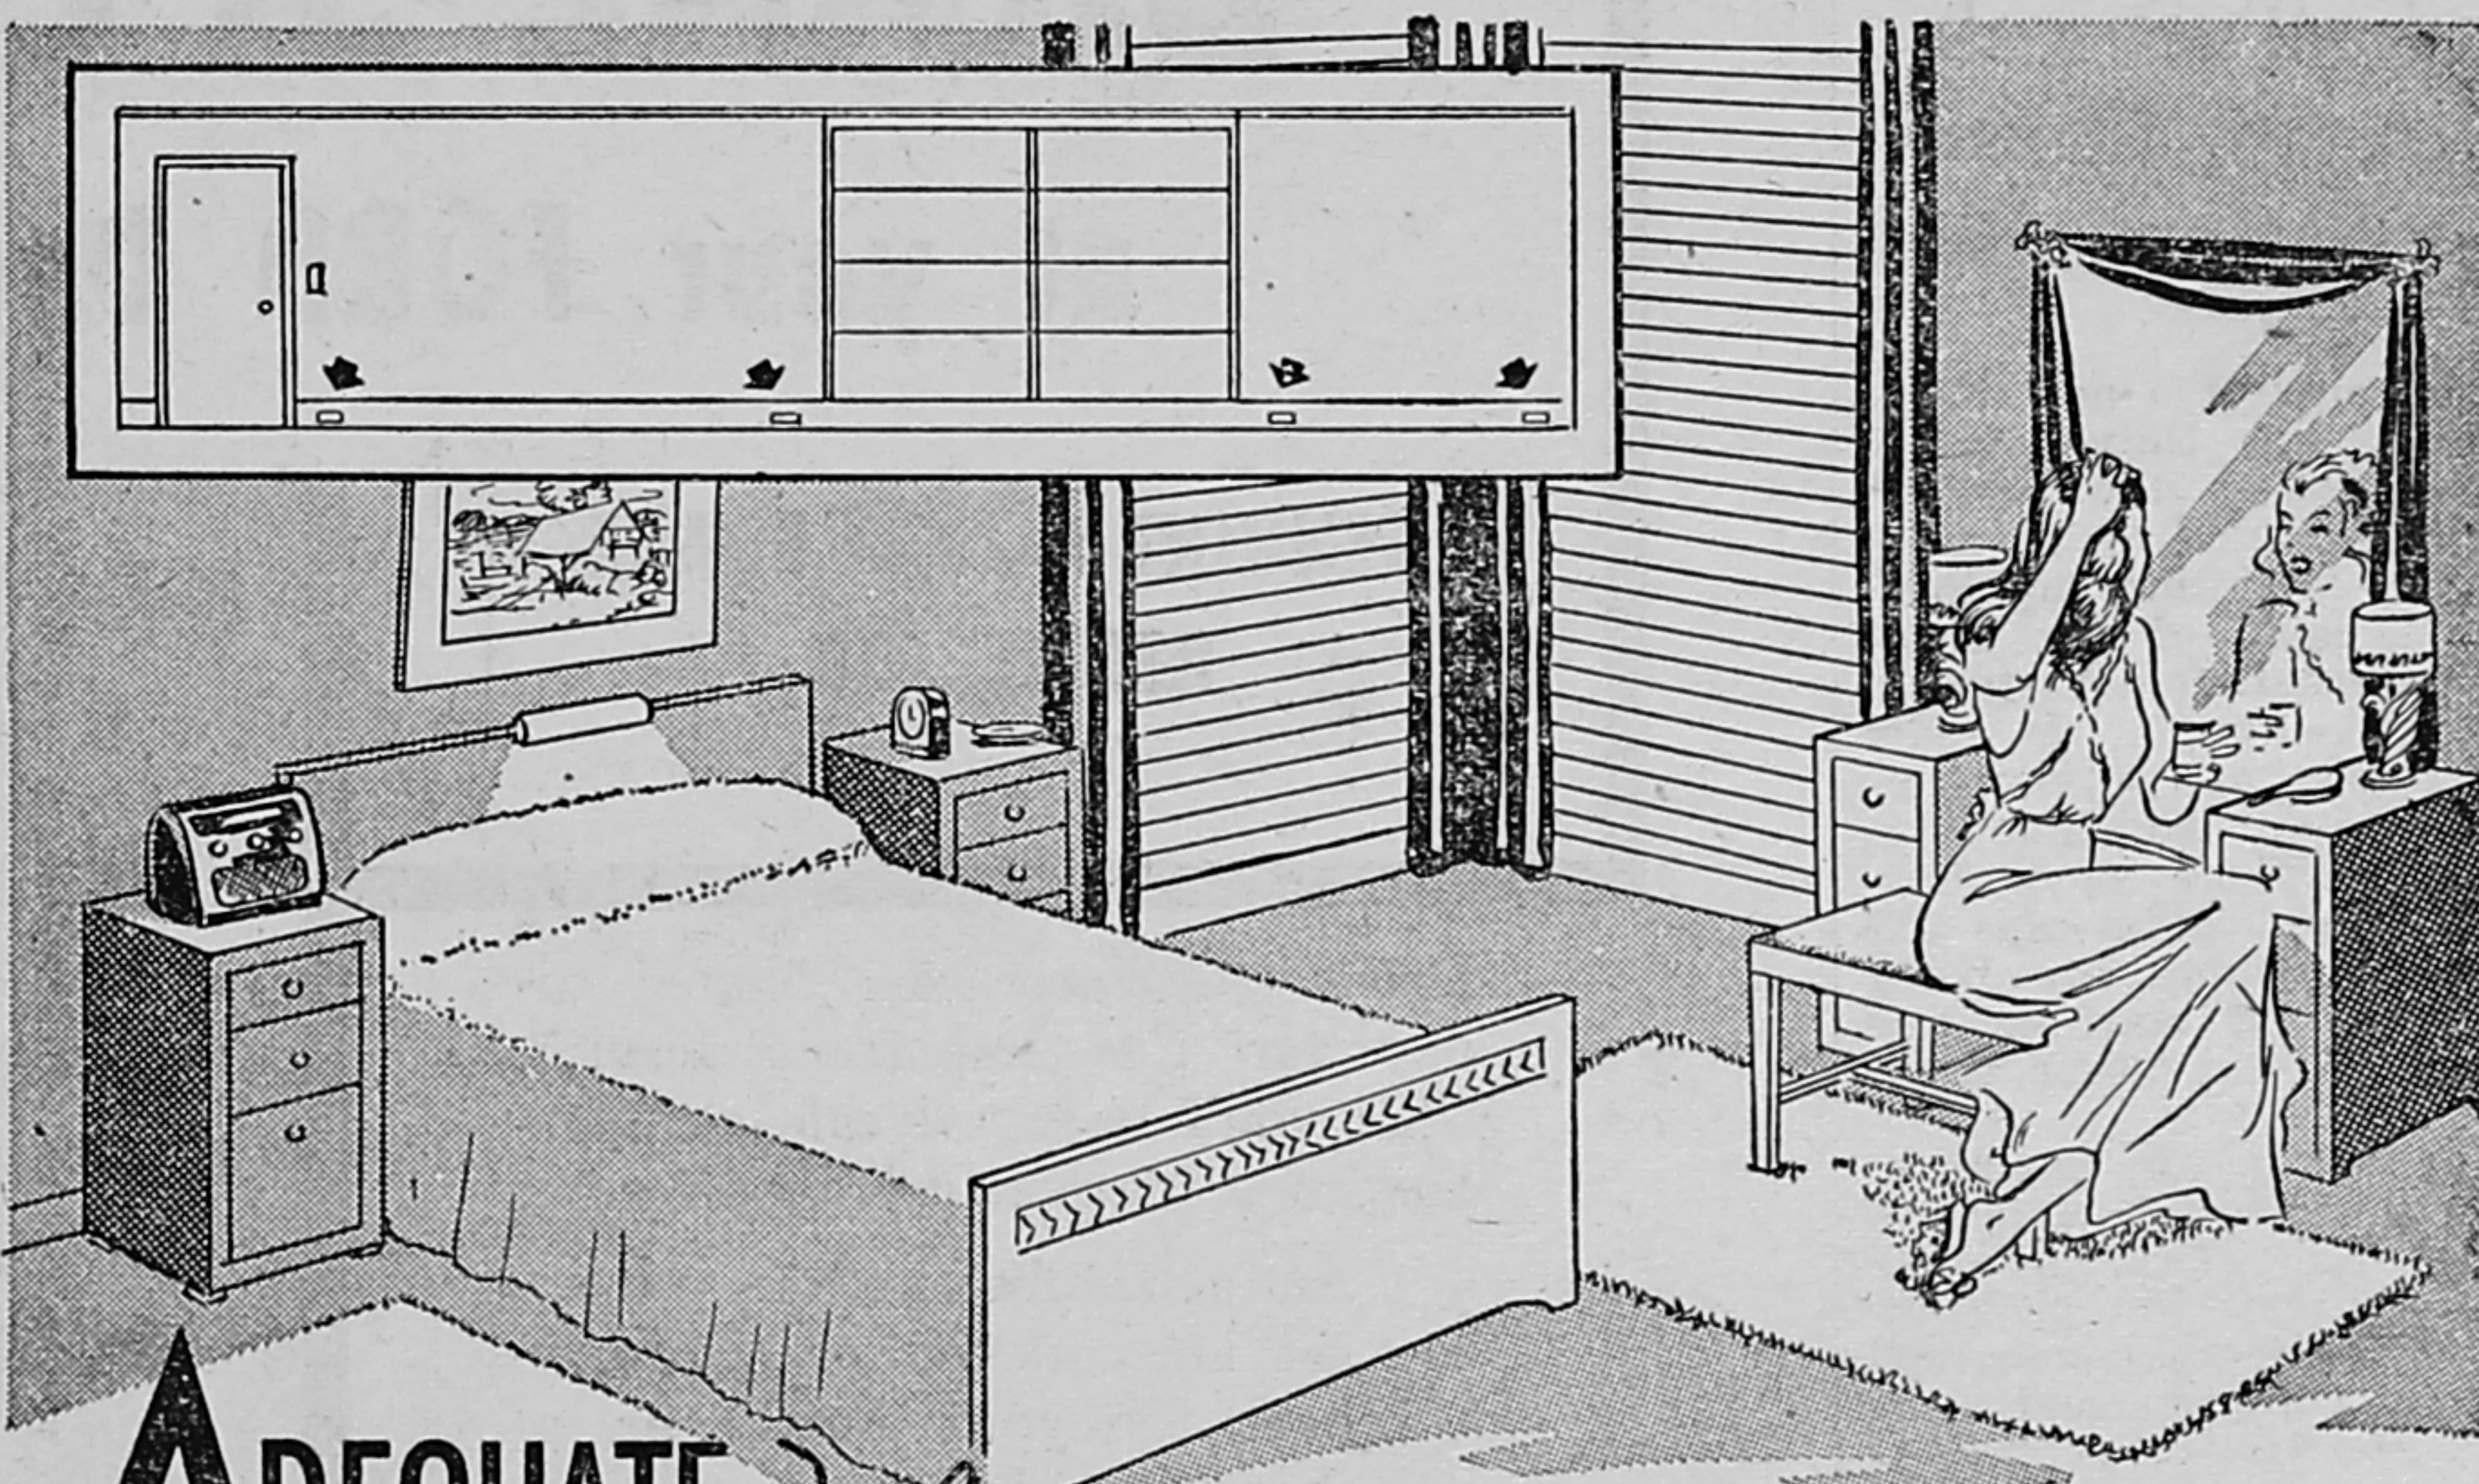

I sometimes think people are the same way—and the strength of America is its mixture of so many different strains—some from one country, some from another—right down to little differences: like folks who have a taste for beer and those who prefer cider.

From where I sit, so long as we never become intolerant of one another's different tastes—so long as we live together with our differences, and even supplement them the way brome grass does alfalfa, then we're a mighty good crop!

So neighbor—enjoy your cider while I enjoy my beer! Vote for your candidate—I'll stand by mine! But never let our differences divide us!

Joe Marsh

CHARLES W. CLABAUGH

REPUBLICAN FOR

Representative In The General Assembly

For 10 years CHARLES W. CLABAUGH has represented the 24th District in the General Assembly of Illinois.

He has worked aggressively and intelligently for those principles of government with which most people of this district agree.

He has been independent and forceful in his actions in the interests of the people of the State and of this District.

In the 64th General Assembly he led a successful fight against Cook County Politicians and Organized Radicals who attempted to "take over" the government of Illinois through Senatorial Reapportionment. He will continue that fight which promises to assume great proportions in the coming Session.

He Has and Will Oppose Any Attempt to Fasten a State Income Tax Upon the People of This State.

Representative Clabaugh has made no attempt to build up a political patronage machine to re-elect himself. He has spent his legislative time and effort in the interest of good government and sound economy, believing that that is the best recommendation for continued public service.

His endorsement by the Illinois Agricultural Association, various educational groups, the Illinois Federation of Labor, and many business and professional organizations has proved the wisdom of this belief.

U. of I., Chicago, Has Fast Growing Library

The library at the Chicago Undergraduate Division of the University of Illinois has the distinction of being one of the newest and fastest growing libraries in the Middle West. It now contains 40,000 volumes, eight times as many as when the library first opened in the fall of 1946. Special emphasis has been placed on reference facilities with a collection that numbers 2,000 selected volumes. More than 2,200 bound files of periodicals and a current periodical subscription list of 500 publications supplement the reference books. According to Librarian David K. Maxfield, the number of volumes will be increased to 70,000 within the next year. The large reading room of the library provides study space for 800 students. With windows on two sides overlooking Lake Michigan and a permanent exhibit of modern paintings decorating the walls, the library shows no trace of its former use as a galley for Navy personnel when Navy Pier was the site of a wartime training school.

New Radio Tube Lab At Univ. of Illinois Among Nation's Best

With the opening of a new \$142,000 laboratory, the University of Illinois ranks among the best in the nation in facilities for vacuum tube research, according to Prof. W. L. Everitt, head of the U. of I. electrical engineering department. Vacuum tubes, familiar in radio and television sets, are of vital importance in modern telephone systems and in airplane navigation. Their wartime application was extensive. Now the tubes are being used increasingly in machine tool operation and electric power transmission. Tube research is an important part of the University's \$500,000-a-year program of electrical engineering investigation. The program includes navy contracts, commercial contracts, army contracts and some sponsored by the U. of I. Graduate College. Most of the work of Dr. A. L. Samuel, director of vacuum tube projects, and his staff of 40 researchers is directed toward development of new tube types. The director stresses the need of perfecting precision techniques in order that duplicate tubes can be machine fabricated.
